

CONTINUITY OF IMPROVE CARBON DATA THROUGH THE 1 JANUARY 2005 INTRODUCTION OF NEW ANALYTICAL INSTRUMENTATION

The plots that follow are time series of network-wide statistics. Each point is calculated from all observations on a given sampling date. The concentrations [OC], [EC], [TC], [Ox], and [Ex] were downloaded from CIRA in August 2007.

They are corrected for sampling artifacts based on backup filters collected at selected sites.

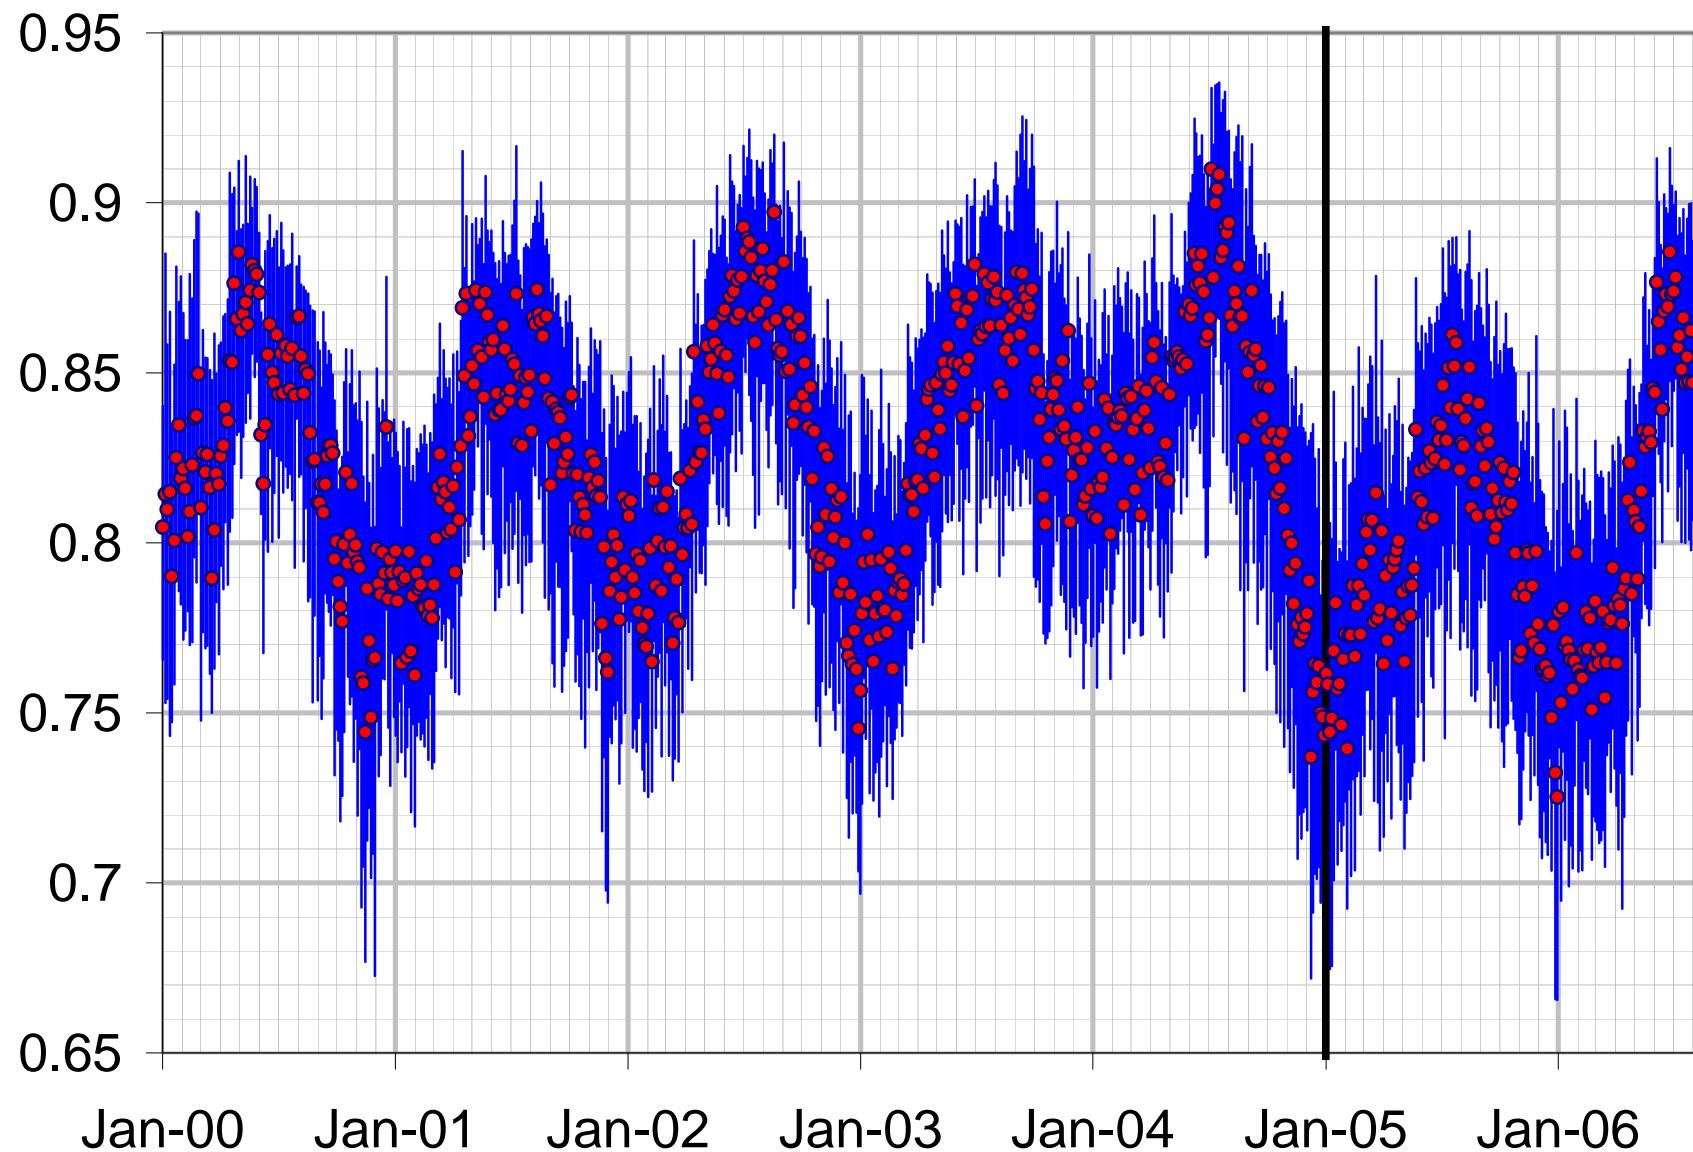

WHW, 8/23/07,

slide 9 corrected 10/23/07

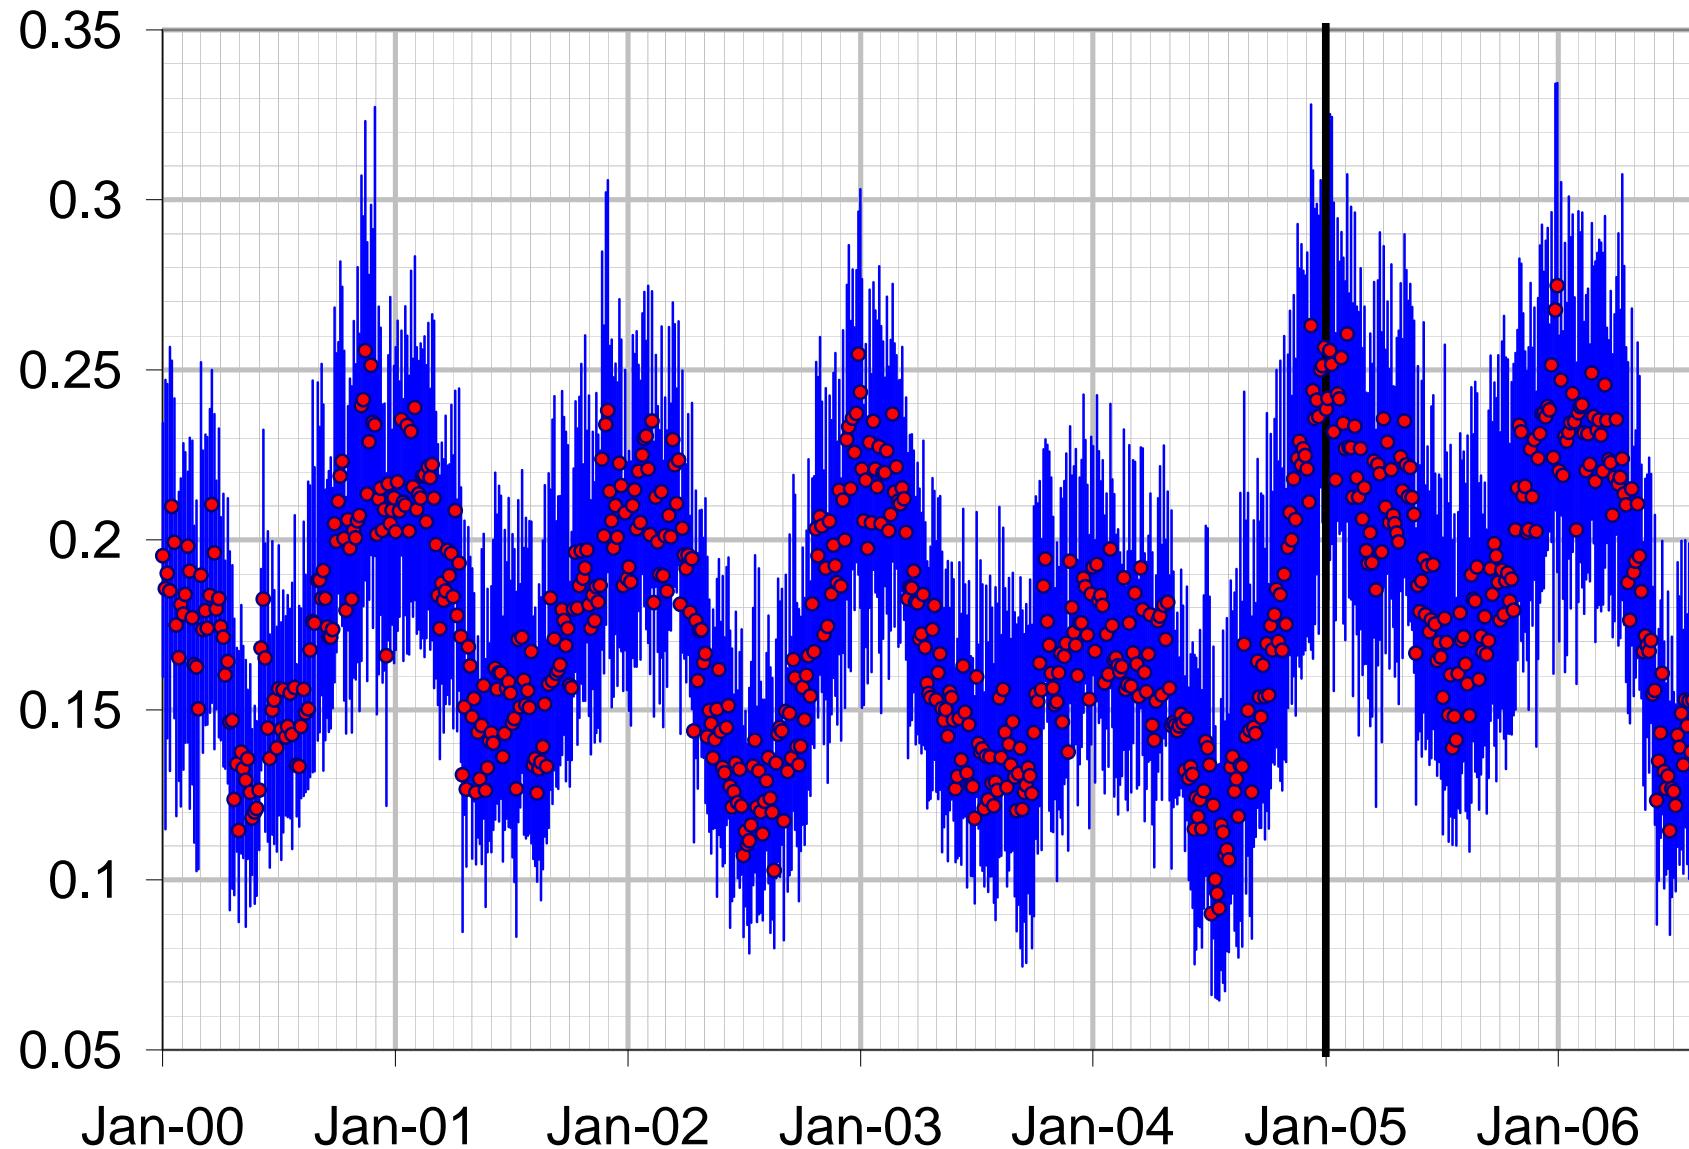

$\frac{OC}{TC}$

MEDIAN AND INTERQUARTILE RANGE
ENTIRE NETWORK, ALL VALID DATA

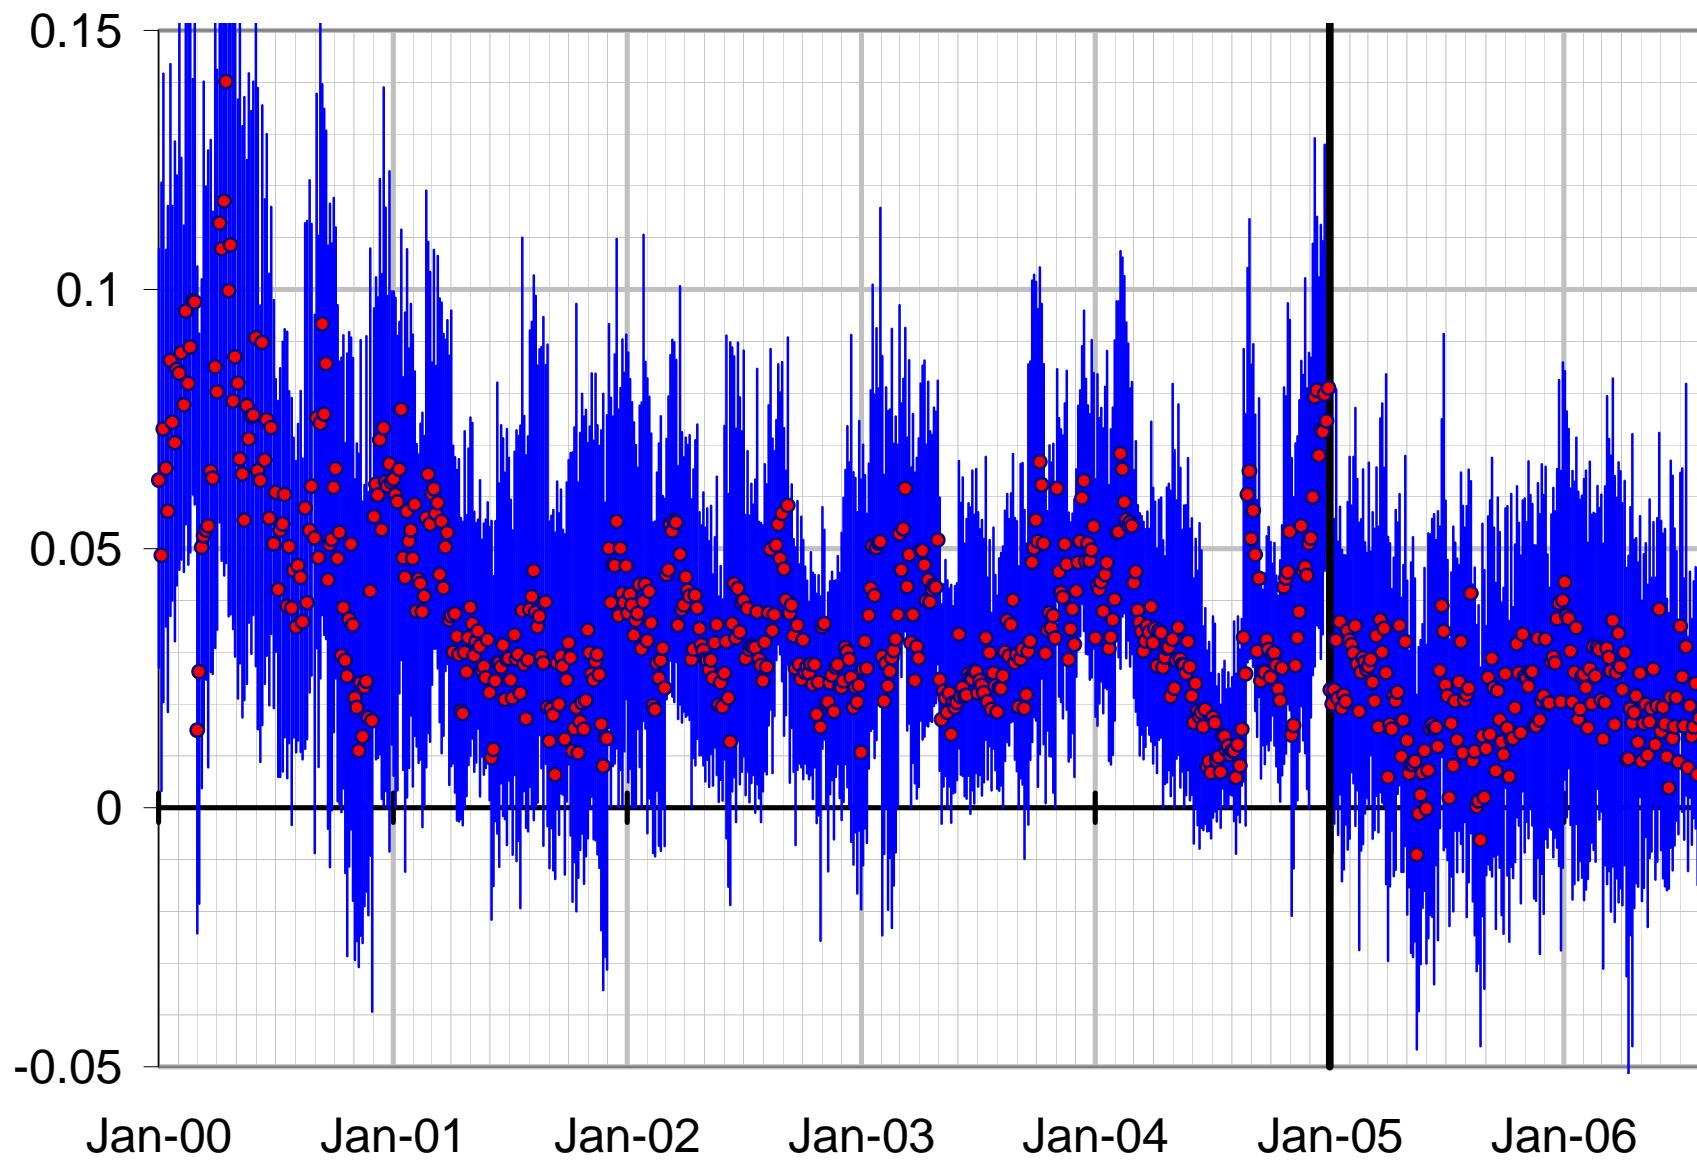

$$\frac{EC}{TC} \left(= 1 - \frac{OC}{TC} \right)$$
