

# The WaterLIFE DECLARATION

We, the undersigned, share a vision for healthy rivers, fair water use and sustainable supply chains. We are all committed to achieving this vision and recognise the importance of the following to do so:

## PARTNERSHIP

Support and investment in the Catchment Based Approach, recognising catchment partnerships are an essential basis for collaborative action and impact at all scales.

## EQUITY

Through its new abstraction and agricultural policies, the government must create a level playing field and ensure environmental protection across England and Wales.

## COLLABORATION

All players working together openly, honestly and without blame, to develop shared, evidence-based and deliverable solutions.
