

The best sites on the Web – for pupils, teachers and parents. ATW helps teachers teach.

You will find the ATW at this address:

www.byteachers.org.uk

How often have you visited an “educational” web site, only to find an apparently random jumble of pages that bear no relation to your subject, teaching or learning?

The ATW is an association of web sites created by the real experts – teachers. To become a member the website must fulfil the following criteria, and be given a vote of approval by the current members.

- They must supply high quality teaching resources and materials for free
- They are built and maintained by teachers or ex-teachers
- They are comprehensive and user friendly

You can recognise if a site is a member of the ATW, as it will carry the logo at the bottom of this page on its homepage.

Key data

- 65 approved sites covering all curriculum areas and key stages
- Over 10 Million pages are accessed every month by teachers just like you!
- Over 18,000 educational resources are available FREE
- Over 6,000 photocopiable teaching resources can be downloaded for FREE
- We offer over 6,000 online teaching resources
- Over 550,000 teachers and pupils visit our sites every month!

*Why spend £'s on commercial internet resources?
The best are available here and they're FREE*

Who is in the ATW?

All members are teachers with recent or current classroom experience. We all produce teaching resources for the World Wide Web which are free to the users, and which are written to support the curriculum in UK schools. Any teacher who writes suitable materials is welcome to join.

What does the ATW do, and why?

The ATW helps its members share ideas and work together. It provides a single portal, which is a guarantee of quality for pupils, teachers and parents. It does not charge its members for any services, and contributors share any organizational tasks.

How many people use ATW sites?

Some of our newest sites may attract smaller numbers, but the most well established clock up many thousands of hits daily. These visitors include children, teachers, student teachers and parents in the UK and almost every country in the world.

What do we have to offer?

Links to absolutely thousands of pages of teaching materials, classroom resources, lesson plans, online lessons and activities, newsletters, teaching ideas, revision aids, reading lists, discussion groups and much more — just about everything you need from the internet to help you do your job!

Simply visit www.byteachers.org.uk and find the best the web has to offer!
