KANSAS WE	EKLY MARKET RECAP	Recap For Week Ending		December 20, 2024
Receints:	This Wook: 9 141	Week Δσο: 11 308	Vear Ago:	6.803

Compared to last week, steers under 800 lbs sold steady to 2.00 higher, while steers over 800 lbs sold steady to 3.00 lower. Heifers sold mostly 2.00 to 6.00 higher. Demand was good as this is the last auction feeder cattle marketing week of the year in Kansas. Compared to last week, slaughter cows and bulls sold steady to 3.00 higher. In the feedlot trade, live sales sold steady at 191.00. In the hay market this past week, demand remained light, and prices were mostly steady. The supply of hay available remains heavy as almost all contributors indicated that there is lots of hay sitting around. Those producers wanting to sell their hay are discouraged by the lower prices and many have chosen to hold onto their hay until prices rise. Cattle are still grazing on wheat and rye in some areas and the warm and dry weather all contribute to less hay being fed. All of us here at USDA-KDA Market New Service wish each and every one of you a safe and joyous holiday season.
