

# CONTENTS

Introduction.....	4
Executive Summary .....	5
<b>1. Current, under construction and planned capacity of underground gas storage in the world .....</b>	<b>10</b>
<b>1.1 Current capacity of UGS in the world (end of 2023) .....</b>	<b>10</b>
Global storage capacity has accelerated its growth.....	10
Regional breakdown: North America leads the market .....	11
Top Ten league .....	11
The growth rate has returned to pre-2015 levels .....	12
Global working gas capacity accounts for almost 11% of 2023 gas consumption.....	13
Depleted fields dominate, but UGS in salt caverns is key to deliverability .....	13
<b>1.2 Storage projects .....</b>	<b>16</b>
The pipeline of UGS projects under construction has grown by 33% in just two years.....	16
Identified projects would add 112 bcm.....	18
<b>2. A new global gas security of supply architecture with LNG and storage at the center.....</b>	<b>21</b>
<b>2.1 The crucial role of gas storage .....</b>	<b>21</b>
The key functions of gas storage .....	21
Storage and LNG procurement at the center of policies on gas security of supply .....	21
Nearly full stocks ahead of winter 2024/25 .....	26
<b>2.2 A still fragile rebalancing of the global gas market .....</b>	<b>27</b>
The rebalancing of regional markets ultimately fell on demand curtailment.....	27
LNG is now the major source of supply in Europe and flexible US LNG takes the lion's share....	28
Global gas demand has returned to growth, but its long-term outlook remains uncertain.....	30
An enhanced role for LNG, but supplies are still tight.....	31
International gas prices tend lower, but remain volatile .....	33
Implications for underground gas storage .....	36
<b>2.3 Storage enhances LNG flexibility.....</b>	<b>38</b>
Reduced flexibility in the EU/global gas market.....	38
A new gas/LNG security of supply architecture under the lead of the IEA.....	39
<b>3. Major trends by region in 2023 and 2024 .....</b>	<b>40</b>
<b>3.1 Europe: Increased storage capacity and full stocks .....</b>	<b>40</b>
European UGS capacity reaches 26% of the region gas consumption .....	40
European gas stocks reached their absolute maximum on record .....	41
Europe is well-prepared for winter 2024/25.....	43
<b>3.2 Ukraine: The key role of underground gas storage .....</b>	<b>46</b>
Stock levels reached nearly 13 bcm on 1 November 2024 .....	46
Winter 2024/25 energy supplies at risk .....	46
In 2024, European traders have been reluctant to store natural gas in Ukraine.....	47
Diversification of routes and sources of potential gas deliveries to Ukraine.....	48
<b>3.3 Russia: Geological exploration under way to create UGS in the Far East.....</b>	<b>50</b>
Minor changes in UGS metrics since 2019 .....	50
Gasification and creation of UGS facilities in the Far East.....	51
<b>3.4 United States: UGS in salt caverns boosted by the growth in LNG exports and renewables..</b>	<b>52</b>
No change in UGS metrics yet .....	52
A new round of UGS development in salt caverns along the Gulf Coast .....	52
Stock levels at higher levels than their five-year average .....	54
<b>3.5 China: Storage has entered its golden age.....</b>	<b>56</b>
China again achieved a strong growth in UGS working gas capacity .....	56
An 83% increase in UGS capacity in just 3 years .....	58
Long-term plans: 80 to 100 bcm of working gas capacity .....	58

Together with LNG storage, the storage capacity accounts for nearly 10% of gas demand.....	59
Heating season 2023/24 and winter 2024/25 preparedness .....	60
<b>3.6 Central and South America, and Mexico, advance UGS projects.....</b>	<b>62</b>
Argentina: The new energy law will boost much needed investment, including in UGS.....	62
Brazil: First UGS facility of the country to be launched in 2024 .....	63
Mexico: The new government will have to expedite UGS construction .....	64
<b>3.7 The Middle East is expanding its storage capacity to meet increasing peaks in gas demand. 66</b>	
Iran: Expansion of gas storage delayed by lack of funding.....	66
Saudi Arabia: First deliveries from the Hawiyah Unayzah gas storage .....	67
UAE: Strategic gas storage to respond to fluctuations in gas demand and optimize gas supply. 67	
<b>Annex: Methodology .....</b>	<b>68</b>
<b>List of Tables, Figures, Boxes and Maps .....</b>	<b>69</b>
