1. EXECUTIVE SUMMARY

More than 95 percent of our food comes from two primary sources: soil and water. Both are essential for plants in the absorption of nutrients and play a crucial role in connecting and sustaining our ecosystems. This interdependent relationship forms the basis of our agricultural systems.

Once more, World Soil Day (WSD) has gained increasing attention, drawing in new individuals and communities as soil assumes a growing significance on the global stage. A hybrid ceremony held at the Sheikh Zayed Centre, situated at the Food and Agriculture Organization of the United Nations (FAO) headquarters in Rome, saw the participation of over **3 000 individuals from 180 countries**. This year witnessed a remarkable increase in the number of registered events, from **2 308 in 2022 to a staggering 10 000 events in 2023**. This overall increase was primarily driven by Thailand and the Islamic Republic of Iran, where more than 6 000 events were hosted, spanning all provinces of both countries.

The media also contributed, publishing over **600 published articles** reaching **910 800 415 people**. Media outlets across the globe ran stories and articles on soil, among them [Forbes](#), [Canindia News](#) and [The Middle East North Africa Financial Network](#), India's [Hindustan Times](#), [The Quint](#) and [NDTV](#),. Italy's [ADNkronos](#), [Wired.it](#) and [Ansa.it](#), Nigeria's [The Guardian](#) and [The Nation](#), Seychelles' [Seychelles News Gazette](#), Australia's [The National Tribune](#), and Thailand's [Bangkok Post](#). A full list of articles can be found in Annex 1.

On social media, FAO made its voice heard by sharing soil-specific content on its corporate platforms. In total, the organization published over 400 multilingual posts on social media and was mentioned 90 600 times in related content through the official hashtags #WorldSoilDay, #SoilAction and #WaterAction, potentially reaching **405 million people**.

Figure 1:FAO. 2023. Key statistics from the 2023 World Soil Day celebration. [Infographic]

2. BACKGROUND

World Soil Day is 5 December, the United Nations (UN) day that celebrates healthy soils for a healthy life. Why do we need to put a date in our diaries every year to stress how important soils are? The answer is simple: because the fate of our planet, from its ecosystems to natural resources, biodiversity and people, hinges on the state of its soil.

In December 2013, the 68th session of the General Assembly of the United Nations (UNGA) named 2015 as the International Year of Soils (IYS) and 5 December as World Soil Day, the official day to raise awareness of soils (A/RES/68/232). The UNGA gave FAO's Global Soil Partnership (GSP) the official mandate to coordinate the implementation of its global campaign. World Soil Day is observed on 5 December in recognition of the official birthday of the late King Bhumibol Adulyadej of Thailand, who was one of the leading proponents of this initiative.

More specifically, the objectives of the print and digital campaign on soils are to:

- inform, educate, and engage both followers and the public on the importance of soils;
- raise awareness on how we all rely on healthy soils;
- show how sustainable soil management practices are crucial for the health of ecosystems and human well-being; and
- call on governments, the private sector, and the public to safeguard soils.

World Soil Day acts as a global celebration consisting of activities such as photography exhibitions, film festivals, lectures, panel discussions, puppet shows, food bazaars, tree planting, fashion parades, concerts, sports competitions, quizzes, drawing contests, seminars, workshops, speeches, public awareness campaigns, and poetry recitals. Every action we take has an impact. These events involve FAO offices and GSP partners as well as international and national non-governmental organizations (NGOs), policymakers, international celebrities, local dignitaries, farmers, soil practitioners, civil society entities, and young people.

3. THEME OF THE YEAR: SOILS AND WATER, A SOURCE OF LIFE

More than 95 percent of our food is produced on land, starting with soil and water, both crucial for nutrient absorption by plants. The interconnectedness of soil and water and the need for integrated management in addressing global soil and water challenges have been broadly discussed among the academic community. However, knowledge gaps still exist.

Soil degradation, caused by human activities and climate change, puts pressure on water resources. Erosion reduces water infiltration, leading to decreased water availability for plants and organisms. Sustainable soil management practices (such as minimum tillage, crop rotation, organic matter addition, and cover cropping), improve soil health, reduce erosion and pollution, and enhance water infiltration and storage. These practices also preserve soil biodiversity, improve fertility, and contribute to carbon sequestration, making soil a valuable ally against climate change.

The World Soil Day 2023 and its campaign aim to raise awareness on the importance and relationship between soil and water in achieving sustainable and resilient agrifood systems and the need to identify knowledge gaps and solutions for the integrated management of soil and water resources in a changing environment. World Soil Day is a unique platform that celebrates soils and engages citizens around the world to improve soil health.

Over 700 GSP partners and all FAO members are the key stakeholders able to trigger action on WSD at the local, national and global level. All interested actors, including FAO regional, subregional and country offices, actively spread the word, supporting the organization of events in their respective countries and regions, and registering their planned event or activity on the interactive map.

[READ THE KEY MESSAGES](#)

4. CAMPAIGN MATERIAL: CONTENT AND PRODUCTS

The World Soil Day 2023 campaign was launched with a special announcement [newsletter](#) in October, presenting the three contests and the campaign toolkit. All FAO country and regional offices, as well as private and governmental initiatives and the public, were invited to participate in the celebration using official campaign materials. Easily accessible information and visuals on the website, combined with a [TRELLO board](#), reinforced the identity of WSD through large and small celebrations worldwide.

At the centre of the campaign was the visual identity package composed of the official campaign poster, social media cards, mega banner, web banner, T-shirt print design, virtual background and PowerPoint template available in all UN languages and more.

Two videos have been showcased, each portraying the captivating link between soil and water. [Soil and water: a source of life](#), (see figure 1) delves into the heart of our planet's lifelines and explores the essence of their symbiotic relationship. [The symbiotic dance of soil and water, a source of life](#) (see figure 2) uses poetic lyrics and hypnotic stop-motion animation to provide an immersive journey that witnesses the dynamic interplay between soil and the power of a summer thunderstorm.

5. INTERNATIONAL SOIL PRIZES

5.1 THE GLINKA WORLD SOIL PRIZE

The [Glinka World Soil Prize](#) 2023 was awarded to Professor Ravendra (Ravi) Naidu, a global expert in contamination studies. In a career spanning over three decades, he has made monumental contributions within research and beyond, publishing over 900 articles, and contributing breakthrough research in fundamental knowledge of contaminant-soil interaction and has significant implications for soil management. His research has moved into practical action through capacity building, raising millions in external funds, and the organization of training programmes and workshops to foster the remediation of contaminated sites.

5.2 THE KING BHUMIBOL WORLD SOIL DAY AWARD

Photo 2: The King Bhumibol World Soil Day Award was awarded to The Soil and Fertilizer Society of Thailand

The [King Bhumibol World Soil Day Award](#) was awarded to the **Soil and Fertilizer Society of Thailand** (SFST), for its commitment and exceptional dedication to engaging a wide audience on the importance of soils. To celebrate World Soil Day 2022, a Thai World Soil Day committee was initiated, comprising of a wide variety of stakeholders who promoted World Soil Day under a campaign entitled *Spirit of soil, spirit of partnership*. The SFST played a significant role in the coordination of this campaign, which brought the message of soils' importance in food

production to the public, young people, and many stakeholders. The SFST and its members hosted over 500 events, reaching over 150 000 people in person and over 11 million individuals

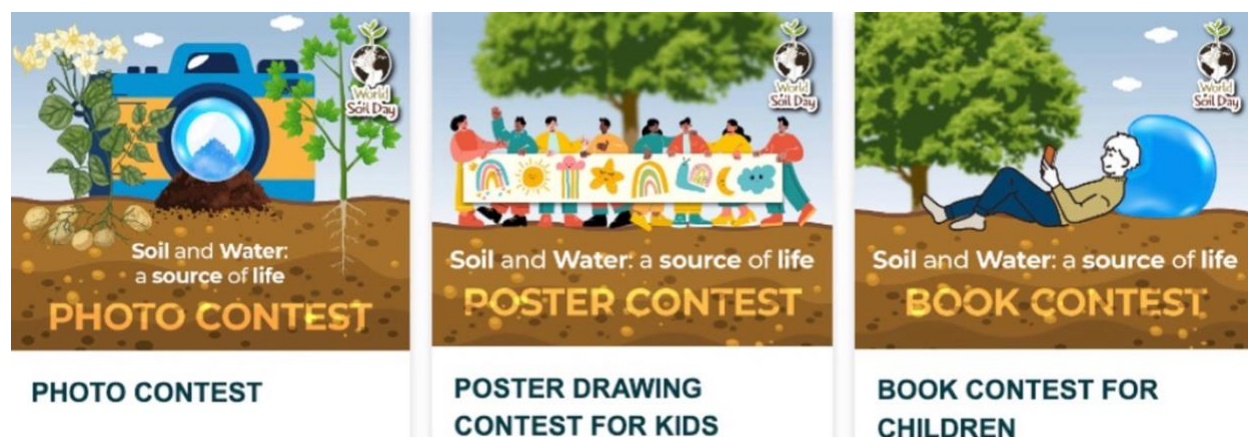

through televised and radio programming. This outreach impacted a wide variety of stakeholders and showcased the importance of soils for food security and nutrition.

6. CITIZEN ENGAGEMENT

Supplementing the campaign material, the GSP launched contests to encourage participation by as many people as possible in the months leading up to WSD. Three competitions ([Photo contest](#), [Kids4Kids poster](#), and a [children's book](#)) were launched to raise awareness on the importance and relationship between soil and water in achieving sustainable and resilient agrifood systems and the need to identify knowledge gaps and solutions for the integrated management of soil and water resources in a changing environment. In line with tradition, an open call invited all to illustrate through photos, posters and booklets why soil and water are fundamental for a healthy life. Designers, educators, and youth submitted their entries on this year's theme, *Soils and water: a source of life*.

Figure 5 FAO.2023. Three contests launched as part of the World Soil Day 2023. [Infographics]. <https://www.FAO.org/world-soil-day/contests/en/>

Laura Bertha Reyes Sanchez, Past-President of the International Union of Soil Sciences (IUSS), announced the winners of the booklet contest, while Isabelle Verbeke revealed the names of the winners of the photo and poster contests during the official headquarters ceremony. The winners of the photo and poster contests were determined through an online public voting.

6.1 KIDS2KIDS POSTER DRAWING COMPETITION

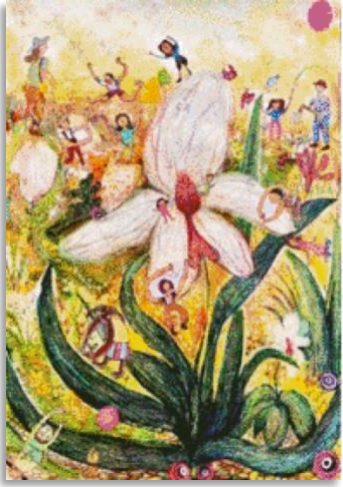

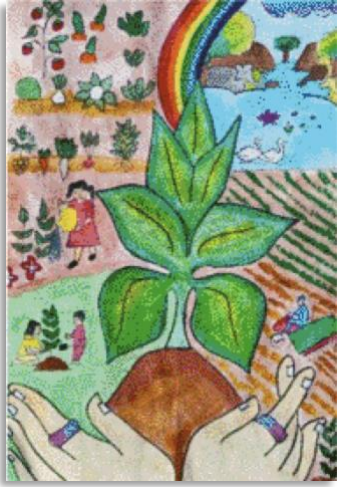

Children between ten and fourteen were encouraged to use their imagination to create posters showing how healthy soils grow healthy and nutritious food. Over 200 amazing entries were received from all over the world and an online voting system was set up to encourage public participation, which reached 10 000 votes! Certificates were sent to winners of the WSD posters and booklet contests.

Submissions were divided into two age categories to level the playing field, and three winners were selected in category A (see table 1) and category B (see table 2).

[KIDS2KIDS POSTER DRAWING CONTEST](#)

6.3 CHILDREN'S BOOK CONTEST

The children book contest called for designers, scientists, and other soil-acquainted creators to submit short books on the importance of soils for food and nutrition with the tagline *Soil and water, a source of life*. Submissions were open from mid-October to 20 November and the GSP received a total of 50 artworks of a high standard. The winner received a cash prize of USD 1 000, while second and third place holders received a cash prize of USD 500 and USD 250, respectively, from IUSS and FAO's GSP.

CHILDREN BOOK CONTEST

6.4 PHOTO CONTEST

In the framework of the World Soil Day 2023 campaign, the GSP initiated a captivating artistic journey worldwide. The aim was to engage both expert and amateur photographers, as well as aspiring artists, in capturing the essential characteristics of soil and water in a single, compelling image: a snapshot capable of representing a myriad of stories. The response to our call surpassed all expectations, as we received over 500 submissions from every corner of the planet. These contests generated a remarkable buzz on social media platforms, exceeding 12 000 interactions on our Facebook page.

7. EVENTS

7.1 WORLD SOIL DAY 2023 OFFICIAL CELEBRATIONS

The official ceremony for WSD took place on 5 December 2023. With over 3 000 participants gathered in a hybrid format, the event featured keynote speeches, panels, awards, artistic performances and contests, engaging the world's citizens in promoting sustainable agrifood systems. The event started with a warm welcome and introduction by FAO Deputy Director-General **Maria Helena Semedo**. FAO Director-General **Qu Dongyu** then delivered the opening address, setting the tone for a significant and memorable celebration. The stage came alive with dynamic perspectives as the esteemed speakers took the floor.

Photo 3: FAO Director-General Qu Dongyu.

"The delicate balance between soil and water sustains many ecosystems that are vital for human wellbeing and food production. The health of our soils and freshwater ecosystems, including our rivers, lakes, and wetlands, directly influence the quantity and quality of our food." **FAO**

Director-General Qu Dongyu

[Read the full speech](#)

H.E. Olga María Pérez Tuna, the Ambassador and Permanent Representative of the Republic of Guatemala to FAO, shared her insights, setting the tone for a compelling discourse. **H.E. Rodney M. Hunter**, Chargé d'affaires of the United States of America Mission to the United Nations Agencies in Rome, not only delivered impactful opening remarks but also made a groundbreaking announcement. He [revealed that the successful SoilFER project](#), initially launched in Guatemala, Honduras, and Zambia, is now set to expand to Ghana and Kenya with a substantial boost of USD 10 million. **H.E. Annette Schneegans**, Deputy Permanent Representative of the European Union to the UN Organizations, and **Mary Mwale**, Head of Food Security and Nutrition at the Ministry of Agriculture, Kenya, brought attention to a crucial theme – the nexus of healthy soils and water for a flourishing planet.

The celebration of World Soil Day featured an enchanting show that highlighted the captivating relationship between water and soil through poetic lyrics and stop-motion animation. The

impressive performance, by the talented duo of illustrator Cecilia Valagussa and musician Marta Del Grandi, allowed participants to appreciate the symbiotic dance of water and soil, a vital link for the well-being of our planet.

7.2 WORLDWIDE EVENTS

Figure 6: FAO. 2023. The world soil day event map. <https://www.FAO.org/world-soil-day/worldwide-events/en/>

Source: FAO. 2023. World Soil Day, 5 December. In: FAO. Rome. Cited February 2024. <https://www.FAO.org/world-soil-day/worldwide-events/en/>

In addition to the official WSD events, 10 000 worldwide events were registered on the [World Soil Day map](#). This represents an astonishing increase from 7 690 events in 2022. The events on the map include a mix of public and private initiatives, such as municipalities, the private sector, media, academia, and local community gatherings.

Figure 7: FAO.2023. Number of events and participating countries for the period 2013–2023. [Infographic].

World Soil Day was celebrated in all regions, also thanks to the support of the GSP Regional Soil Partnerships. By far, most events were registered in the Near East and North Africa (NENA) region and in Asia with more than 6 000 events, mainly due to a tremendous mobilization in Thailand and the Islamic Republic of Iran followed by Latin America, Europe and Eurasia, North America, Africa and Oceania.

Through a global call for WSD pictures across multiple channels (newsletters, direct mailing to WSD organizers, social media and more), over 500 photos were received. The best photos illustrating the wide range of activities organized and diversity of actors celebrating soils on 5 December were compiled into a Flickr photo gallery. At the time of writing of the report, the gallery has had over 500 views.

[VIEW THE ALBUM](#)

9. MEDIA COVERAGE

The celebration of World Soil Day 2023, *Soil and water, a source of life*, received massive media attention throughout the week, with 600 articles reaching over 1 billion people!

Across the globe, magazines and news outlets featured stories and informational pieces covering the importance of soil. Dozens of outlets around the world ran explanatory pieces on why we celebrate World Soil Day, including China's [Shou](#), Argentina's [TN.com](#), Thailand's [National News Bureau of Thailand](#), Cuba's [Radio Rebelde](#) report, and many others.

Moreover, Thailand's [The Bangkok Post](#) reported about the two soil prizes awarded on the 5 December. Excerpts from a selection of articles can be found in the overview below.

UN CHRONICLE: *Soil and water, a source of life*

Lifeng Li, Director of the Land and Water Division, affirmed that it is imperative that we ensure a sustainable management of soil and water for the benefit of our children. He continued by highlighting the growing awareness of the pivotal role of soil and water in our daily lives and showcasing the success of the worldwide campaign.

Other leading outlets reported explaining the story and the importance of the World Soil day referring to FAO data, including [Hindustan Times](#), [The Quint](#) and [NDTV](#), [Forbes](#), Italy's [ADNkronos](#) and [Wired.it](#), and the Nigeria's [The Nation](#).

As reported by several news magazines, including [APO](#), [MENA Financial Network](#), and Nigeria's [The Guardian](#), this year FAO welcomed the announcement of an additional USD 10 million from the United States of America for projects mapping soil fertility in Ghana and Kenya, that, as underlined by Maria Helena Semedo, FAO Deputy Director-General, would benefit smallholder farmers in two more countries and highlight the vital role that healthy and fertile soils play in building resilience to climate change.

[Read the full list of articles](#)

9.1 HOT OFF THE PRESS

A selection of main articles are as follows.

Soil: The Bridge Between Global Environmental Challenges

Healthy soil underpins endless ecosystem processes on which we depend, such as water storage, nutrient cycling, and carbon sequestration. This in turn reduces the likelihood of flooding, landslides and heat stress, while natural ecosystems like forests and wetlands help remove pollutants from the air and water.

Forbes, 2023

World Soil Day 2023: Date, history and significance

World Soil Day 2023: Soil is one of the integral parts of our lives. They provide us with necessary nutrients, are the bed for growth of food items, and are also home to diverse species. Maintaining the standard of soil and ensuring that the quality of soil is healthy is everyone's responsibility.

Hindustan Times, 4 December 2023

2023年世界土壤日 | 主题：“土壤和水：生命之源”

健康的土壤能净化、排出和储存水分，是地球上生命存在的根基； 培肥地力，提高土壤有机质非常重要。土壤中有机质每增加1%，每公顷土壤可多储水150吨。不良的灌溉和排水方式，是造成土壤盐碱化的主要原因；“种子是芯片，耕地是命根子”，水是生命之源，我们95%的食物来自土壤，这要归功于水的力量；“碳达峰和碳中和”是本世纪碳领域重要目标，健康的土壤是碳汇，有助于适应气候变化并减轻影响。

Sohu, 5 December 2023

Italy was the country with the most articles, reaching a total of 44, closely followed by Brazil with 62 and India with 61. For a full overview, please consult the [compiled list](#), where the list can be filtered by country, reach, article name, source and date, or check out Annex 1.

10. SOCIAL MEDIA ENGAGEMENT AND DIGITAL COVERAGE

Between 19 November and 9 December 2023, FAO published 337 social media posts and was mentioned 90 600 times in related posts, potentially reaching 450 million people. All FAO tweets are available [here](#). The hashtags #WorldSoilDay, #SoilAction and #WaterAction peaked on 5 December.

Campaign material and content on the importance of soil for our security and future were made available and shared in all official languages. A [TRELLO board](#) dedicated to the WSD content was made available to partners, colleagues, and other interested parties through the FAO WSD website.

10.1 WORLD SOIL DAY IN SOCIAL MEDIA

Millions of users discussed, debated, and advocated the importance of the linkages between soil and water on social media platforms using the official hashtag of the campaign: #WorldSoilDay, #WaterAction and #SoilAction. Between 19 November and 9 December 2023, FAO's social media channels published post that reached 405 million users. In addition, two social media videos: [Soil and Water: a source of life](#) and [The symbiotic dance of soil and water, a source of life](#) were produced specifically for the ceremony.

A selection of high engagement WSD-related tweets from official UN channels:

10.2 NEWSLETTERS

Four special announcements and two newsletters were prepared and shared to the GSP mailing list to launch the campaign and inform all soil lovers on how to participate in the multiple contests, join the campaign, vote for the online public contests, and keep the audience updated on the latest development. They are key tools that strongly contribute to the global adoption and dissemination of the campaign.

World Soil Day (WSD) is held annually on 5 December as a means to focus attention on the importance of healthy soil and advocating for the sustainable management of soil resources.

An international day to celebrate Soil was recommended by the International Union of Soil Sciences (IUSS) in 2002. Under the leadership of the Kingdom of Thailand and within the framework of the Global Soil Partnership, FAO has supported the formal establishment of WSD as a global awareness raising platform. The FAO Conference unanimously endorsed World Soil Day in June 2013 and requested its official adoption at the 68th UN General Assembly. In December 2013 the UN General Assembly responded by designating 5 December 2014 as the first official World Soil Day.

FAO, within the framework of the Global Soil Partnership (GSP), has received the official mandate to facilitate the implementation of the World Soil Day.

The Global Soil Partnership (GSP) is a globally recognized mechanism established in 2012. Our mission is to position soils in the Global Agenda through collective action. Our key objectives are to promote Sustainable Soil Management (SSM) and improve soil governance to guarantee healthy and productive soils, and support the provision of essential ecosystem services towards food security and improved nutrition, climate change adaptation and mitigation, and sustainable development.
