**RE:** College and Career Success for All Students Act Report

---

The College and Career Success for All Students Act as amended ([Public Act 099-0624](#), effective 7/22/16) requires public institutions of higher education to grant academic credit for Advanced Placement (AP) scores of 3 or higher and International Baccalaureate (IB) scores of 4 or higher. The Act requires the Illinois Board of Higher Education and the Illinois Community College Board (ICCB) to analyze the credit and course granting policies of each public institution and the research used by each institution to determine credit granted.

This report was reviewed by IBHE's Academic Leadership group, comprised of representatives of both two- and four-year public institutions, at its regular meeting on May 29, 2020. I am pleased to submit to you this report, prepared in collaboration with the ICCB. We look forward to continuing to work with you, leaders of institutions of higher education, and other public and private groups upon the review of our findings and recommendations.

## **Academic Credit Granted for Advanced Placement and International Baccalaureate Review Responding to The College and Career Success for All Students Act (009-0624)**

The College and Career Success for All Students Act as amended (Public Act [099-0624](#), effective 7-22-16) requires public institutions of higher education to grant academic credit for Advanced Placement (AP) scores of 3 or higher and International Baccalaureate (IB) scores of 4 or higher. The Act requires the Illinois Board of Higher Education and the Illinois Community College Board to analyze the credit and course granting policies of each public institution and the research used by each institution to determine credit granted.

### **Executive Summary**

---

Two reports are included as part of this review: the first on Advanced Placement (AP) and the second on International Baccalaureate (IB). The two reports follow a similar structure:

- Methodology,
- Research used by campuses,
- Analysis of credit granted, and
- Recommendations.

In both reports, university and community college score articulations were sampled to gauge compliance.

Based on its analysis, the IBHE and ICCB find that all public institutions sampled are compliant with Public Act 099-0624 in that AP scores of 3 or above and IB scores of 4 or above are awarded academic credit as indicated by the comprehensive tables publicly available at each institution's website.

In complying with the legislation, institutions generally designated a point person to gather information on AP and IB curriculum and exam structure. That information was forwarded to appropriate department heads along with the statutory requirements. Faculty then discussed the match between AP and IB curricula and their institution's courses. Decisions were made on that basis, frequently including quite nuanced decisions based on competency as indicated by different AP or IB score requirements.

It is notable that the great majority of AP exams and scores articulate as credit in the institutions' general education program or as major prerequisites or major courses not as general elective credit. In the 4-year institutions sampled for this study, 100% of AP scores of 3 or above received academic credit. With the exception of AP exams articulated with certain studio courses in art and music, all AP scores of 3 or above received at least 3 hours of credit. 89% of AP scores were articulated with either specific courses, major electives, or counted as satisfying requirements of the

institution's general education program. In the case of community colleges sampled, 92% of AP scores are articulated to specific courses.

While the IB curriculum is structured very differently from AP with greater variation in content, institutions again articulated IB subject, score and level with specific courses, not general electives. At 4-year institutions sampled, 97% of IB subject-level-score combinations were articulated with a specific course or articulated with a major or general education elective. Only 3% of subject-level-score combinations were articulated as general elective credit toward graduation. In the case of community colleges sampled, 81% of IB subject-level-score combinations were articulated as specific courses.

Among the report's recommendations are that institutions should:

- include clear policy statements, indicating that academic credit will be granted for all AP scores of 3 or higher and IB scores of 4 or higher in compliance with the legislation.
- review on a rolling basis AP and IB curriculum to ensure that credit granted is consistent with changes in AP or IB curriculum.
- benchmark their credit and course policies against those of other institutions to determine outliers, particularly in cases where only elective credit is granted.

The IBHE and ICCB should periodically audit compliance with the legislation and update their websites with links to each institution's policies and tables of credit granted.

This summary along with the AP and IB reports were reviewed by IBHE's Academic Leadership group, consisting of representatives of both 2- and 4-year public institutions, at its regular meeting on May 29, 2020.

## **Advanced Placement Compliance**

---

Illinois Public Act [099-0358](#), effective 8-13-15, requires public institutions of higher education to grant academic credit for Advanced Placement (AP) scores of 3 or higher. The Act requires the IBHE and ICCB to analyze the credit and course granting policies of each public institution and the research used by each institution to determine credit granted.

### **I. Methods of analysis used in submitting this report:**

IBHE and ICCB collect data on institutional compliance and report where information can be found on each institution's website. IBHE's site can be found at: <https://www.ibhe.org/placement.html>. ICCB's site can be found at: [https://www.iccb.org/academic\\_affairs/baccalaureate-transfer/advanced-placement-ap-exams/](https://www.iccb.org/academic_affairs/baccalaureate-transfer/advanced-placement-ap-exams/). After the Act went into effect, the two Boards audited compliance and informed institutions of any instances where they were not fully compliant.

For this report, five universities' policies were sampled and their credit patterns analyzed. Institutions sampled included: Eastern Illinois University; Illinois State University; University of Illinois Chicago; University of Illinois Urbana Champaign; and Western Illinois University. Three community college sites were sampled: College of DuPage; Parkland College; and Waubensee Community College. A table of AP articulations to courses at these institutions appears as Appendix A.

A statewide transfer task force was established by the IBHE and ICCB and met periodically over fall 2019 and spring 2020. In addition to senior staff from both IBHE and ICCB, this group was composed of campus experts in several appropriate areas, including faculty, chief academic officers, registrars, advisors and transfer coordinators from both community colleges and public universities. A membership list is included as Appendix B. IBHE's standing Academic Leadership group, which includes representatives from community colleges, also met in fall 2019 and spring 2020 on the subject of AP and IB. Both groups discussed their campus approaches to and basis for determining credit.

## **II. Research used by campuses and IAI faculty panels to determine course credit, number of hours and placement:**

In the case of the Illinois Articulation Agreement (IAI) General Education Core Curriculum (GECC), faculty panels met, with support from the College Board, to determine the articulation between the AP curriculum and the IAI course descriptors. This is the same method used by faculty panels in evaluating submissions from IAI institutions. If the course fulfills the requirements of the descriptor, it is approved for the category. A full listing of AP articulations and IAI courses is found at <https://itransfer.org/courses/descriptors.php>.

Based on information gathered by the transfer working group, IBHE and ICCB staff, campuses followed similar methods for researching what credit, course and/or placement to award. Generally, each campus designated a point person to gather information on AP curriculum and exam structure. That information was forwarded to appropriate department heads along with the statutory requirements. Faculty are generally familiar with AP examinations and curricula; indeed, several faculty serve as AP exam readers. Faculty discussed the match between AP curricula and their institution's courses. Decisions were made on that basis, often including nuanced decisions based on competency as indicated by different AP scores.

### **Analysis:**

Based on its review, the IBHE and ICCB find that all public institutions are compliant with Public Act 099-0358 in that AP scores of 3 or above are awarded academic credit as indicated by the comprehensive tables publicly available at each institution's website. The current review found that some newer exams such as AP Capstone are not universally listed and that some AP exams that have no equivalent course at the institution (Latin, for example) are sometimes missing. The boards will reach out to institutions with guidance on these issues.

Institutions have made similar, if not identical, choices in awarding credit. If no corresponding course is offered at the institution, elective credit is granted: for example, a course corresponding to the Chinese Language and Culture AP is not offered at some institutions and thus receives elective credit toward graduation.

It is notable that the great majority of AP exams and scores articulate NOT as general elective credit, but rather as credit in the institutions' general education program or as major prerequisites or major courses. In the 4-year institutions sampled for this study, 100% of AP scores of 3 or above received academic credit. With the exception of AP exams articulated with certain studio courses in art and music, all AP scores of 3 or above received at least 3 hours of credit. 89% of AP scores were articulated with either specific courses, major electives, or counted as satisfying requirements of the institution's general education program. Scores articulated as general or major electives,

tended to be scores of 3 (with 4 or 5 articulated as specific courses) or AP examinations not aligned with university curriculum. The two new AP capstone exams are examples of the latter. The University of Illinois Urbana Champaign awards more general elective credit than other universities sampled but provides more information on placement based on AP score. Excluding UIUC, at the other four universities sampled, 96% of AP scores were articulated with either specific courses, major electives, or counted as satisfying requirements of the institution's general education program.

In the case of community colleges sampled, 92% of AP scores are articulated to specific courses.

In a great many cases, faculty have made nuanced decisions based on score level. For example, University of Illinois Chicago awards credit for Chemistry 100 (5 hours) for a score of 3 but 10 hours (CHEM 122, 123, 124 and 125 – 10 hours) for a score of 4 or 5. For the Computer Science AB examination, Western Illinois University awards 6 hours of credit for a score of 3 and 9 hours of credit (3 defined courses) for a score of 4 or 5. Credit for foreign language courses, with no exceptions in the institutions sampled, varies by score level. Eastern Illinois University, for example, offers credit for 4 hours of foreign language for a score of 3 and 11 hours for a score of 5. Similarly, College of DuPage awards 16 hours of credit for an AP score of 5, equivalent to its four introductory courses.

While not all institutions were included in the sample analyzed, it is abundantly clear that the great majority of AP scores are articulated as either general education courses or other specific courses that serve as major electives or major courses.

In the case of AP courses articulated with the Illinois Articulation Initiative General Education Core Curriculum, all examinations and AP curricula have been articulated with IAI GECC courses. A typical citation is:

**“H2907: World History II (3-semester credits)**

This is a continuation of World History I, continuing from c. 1500 to the present. See the Illinois Transferable General Education Core Curriculum (iTransfer Gen. Ed.) number H2906N. (See also World History II in the Social and Behavioral Sciences section. Credit for courses cannot be used to satisfy both Humanities and Social and Behavioral Science requirements.) *Policies on the acceptance of AP credit vary among academic programs and from institution to institution, so AP credit toward the GECC or major requirements is not guaranteed. A score of 3 or higher on the AP World History exam may be considered as equivalent to successful completion of post-secondary courses approved for IAI GECC H2 907.*  
Feb 2016

**Revised 06/07/2017 – Matches description for S2913N”**

AP scores of 3 or above have been articulated with the exception of foreign languages. In the IAI GECC, only 4<sup>th</sup> semester language courses count in Humanities because the first three semesters are viewed as skills courses that do not match Humanities descriptors. A 4 or a 5, indicating proficiency at the 4<sup>th</sup> semester level is required to receive IAI GECC Humanities credit.

**Recommendations:** Campuses should periodically review their AP placement charts in light of recent and ongoing revisions to AP curricula and examinations. That review should include evaluation of new and newly revised AP curricula and examinations such as Computer Science Principles and the AP Capstone (Research and Seminar).

Institutions should benchmark their credit and course policies against those of other institutions to determine outliers, particularly in cases where only elective credit is granted.

Institutions should double check for internal consistency. For example, 4 hours of course credit is granted for foreign languages, but only 3 hours of elective credit is granted for languages not offered by the institution.

The ICCB and IBHE should regularly review institutional practices and keep listings and links up to date.

The articulation of AP scores may be inconsistent for transfer students depending on whether the transfer-to institution recognizes credit as awarded by the transfer-from institution, the IAI panel recommendations or its own policy. This issue was predicted when the legislation went into effect. The Boards in consultation with the IHEs should work to inform high school and community college counselors of potential differences in articulation among institutions.

## International Baccalaureate Compliance

---

The College and Career Success for All Students Act as amended (Public Act [099-0624](#), effective 7-22-16) requires public institutions of higher education to grant academic credit for International Baccalaureate (IB) scores of 4 or higher. The Act requires the Illinois Board of Higher Education and the Illinois Community College Board to analyze the credit and course granting policies of each public institution and the research used by each institution to determine credit granted. While Advance Placement (AP) exams and IB are significantly different in many respects, this report is a companion to the Advanced Placement report and follows a similar structure.

### I. Methods of analysis used in submitting this report:

While both AP and IB are rigorous curricula, it is essential to note at the outset that AP and IB are significantly different in many ways that make it more difficult to articulate credit for IB.

Advanced Placement	International Baccalaureate
One level	Two levels: standard and Higher (SL and HL)*
38 subject and exam areas	56 broad content areas, including both SL and HL*
Examinations graded independent of teacher, with externally evaluated multiple choice and rubric based assessments scored by higher ed faculty and expert AP teachers	Teacher assessment of classwork, lab, final examination
Subject specific with curriculum largely specified and aligned with U.S. higher education	Generally, a more holistic approach with more teacher discretion on content to meet course objectives

\*In practice, there are many more classes and levels: IB History may concentrate on a single country or multiple regions worldwide. IB has three levels in mathematics: Mathematical Studies (SL only); Mathematics (SL and HL); and Further Mathematics (HL only). In foreign languages, there are “ab initio” classes in addition to SL and HL as well as the possibility to add less commonly taught languages with or without literature. The University of Illinois at Urbana Champaign lists 275 unique articulations, including, for example, “Language A: Literature’ Not Listed Here.”

IBHE collects data on institutional compliance and reports where information can be found on each institution’s website. IBHE’s site can be found at: <https://www.ibhe.org/aaibcourses.html>.

For this report, four universities’ policies were sampled, and their credit patterns analyzed. Institutions sampled included: Eastern Illinois University (EIU); Illinois State University (ISU); University of Illinois at Urbana Champaign (UIUC); and Western Illinois University (WIU). Three community college sites were sampled: City Colleges of Chicago; Parkland College; and Waubensee Community College. A table of IB articulations to courses at these institutions appears as Appendix C.

A statewide transfer task force was established by the IBHE and ICCB and met periodically over fall 2019 and spring 2020. In addition to senior staff from both IBHE and ICCB, this group was composed of campus experts in several appropriate areas, including faculty, chief academic officers, registrars, advisors and transfer coordinators from both community colleges and public universities. A membership list is included as Appendix D. IBHE’s standing Academic Leadership group, which includes representatives from community colleges, also met in fall 2019 and spring 2020 on the subject of AP and IB. Both groups discussed their campus approaches to and basis for determining credit.

## **II. Research used by campuses to determine course credit, number of hours, and placement:**

Through its joint review process, the IBHE and ICCB find that all public institutions sampled have made significant good faith efforts to comply with Public Act 099-0624 based on their particular experience receiving IB scores and institutional contexts.

Determining course articulations for IB is complex and must include (at least) the following factors:

- the variability of course content in the IB curriculum (As noted, IB History may cover one or more regions of the world as determined by the school, but, more generally, individual teachers also have significant curricular latitude within the limits of defined IB course objectives.)
- the level of the exam (standard, or higher level, or “ab initio” in the case of languages), and the
- the wider acceptable score range (4, 5, 6, 7).

Based on information gathered by the transfer working group, IBHE and ICCB staff, campuses followed similar methods for researching what credit, course and/or placement to award. Generally, each campus designated a point person to gather information on IB curriculum and exam structure. That information was forwarded to appropriate department heads along with the statutory requirements. While no concordance table exists for AP and IB, as general advice, it was suggested that credit recommendations for IB be consistent with those previously established for AP.

## Analysis:

There is considerable variation in how many IB exam, course, level and score combinations have been articulated by each institution. Those institutions that receive more IB score reports have articulated more IB subject and score combinations than institutions receiving fewer. UIUC lists 275 separate articulations. City Colleges of Chicago, which receives IB scores from Chicago Public Schools, articulated 85 combinations to its courses. Notably, City Colleges includes “Polish A: Literature,” responding to its particular score receiving pattern. One university articulated only 27 combination based on its score receiving experience but would evaluate other requests on a rolling basis as received.

Institutions have made similar, if not identical, choices in awarding credit. If no corresponding course is offered at the institution, elective credit is granted: for example, a course corresponding to the Chinese Language and Literature IB is not offered at some institutions and thus receives elective credit toward graduation.

As is the case with AP, it is notable that the great majority of IB exams and scores articulate NOT as general elective credit, but rather as credit in the institutions’ general education program or as major prerequisites or major required or elective courses. In the 4-year institutions sampled for this study, 100% of IB scores of 4 or above received academic credit.

At 4-year institutions sampled, 60% of IB subject-level-score combinations were articulated with a specific course and another 37% articulated with a major or general education elective. Only 3% of subject-level-score combinations were articulated as general elective credit toward graduation.

*Articulations of IB Subject-Level-Score Combinations*

	<b>Specific Course</b>	<b>Major or Gen Ed Elective</b>	<b>General Elective</b>
EIU	49.3%	40.3%	10.4%
ISU	87.6%	8.2%	4.1%
WIU	70.4%	22.2%	7.4%
UIUC	52.0%	47.6%	0.4%
<b>Average</b>	<b>60.1%</b>	<b>36.9%</b>	<b>3.0%</b>

Again, similar to AP articulation patterns, faculty have made nuanced decisions based on score and level. For example, Eastern Illinois University awards 20 hours of credit for a score of 7 on IB Further Mathematics (MAT 1441G, MAT 2250G, MAT 2442, MAT 2345 & MAT 2800), 17 hours for a score of 6 (MAT 1441G, MAT 2250G, MAT 2442, MAT 2345) and 9 hours for a score of 4 or 5 (MAT 1441G and MAT 2250G). Institutions paid particular attention to foreign languages given the subject options of language only, language and literature, and language ab initio. UIUC has 19 separate articulations for Japanese alone.

Because of the content variability among courses in certain areas, institutions were somewhat more likely to articulate courses as major or general education electives as opposed to specific courses than is the case for AP. IB history is the most obvious instance in that the specific region is not specified, so Humanities or history credit is awarded as opposed to a specific course or courses.

Even so, UIUC gives different levels of credit and credit hours based on IB level (SL or HL) and score.

While not all institutions were included in the sample analyzed, it is abundantly clear that universities have responsibly and carefully articulated IB courses based on subject, level and score with the great majority of combinations articulated as either general education courses or other specific courses that serve as major electives or major courses.

In the case of community colleges sampled, 81% of IB subject-level-score combinations were articulated as specific courses. 14% were articulated as major or general education electives with 5% articulated as general electives. Community colleges were somewhat less likely to make nuanced decisions based on level and score than were the universities. Community Colleges, like universities, appear to articulate IB based on their score receipt experience. City Colleges, serving Chicago Public Schools with an investment in the IB curriculum, articulate significantly more IB scores than the other two sampled.

Articulations of IB Subject-Level-Score Combinations

	Specific Course	Major or Gen Ed Elective	General Elective
City Colleges	70.2%	29.8%	0.0%
Parkland	100.0%	0.0%	0.0%
Waubensee	81.3%	0.0%	18.8%
<b>Total</b>	<b>80.7%</b>	<b>14.2%</b>	<b>5.1%</b>

**Conclusions and Recommendations:**

All institutions sampled for this study have posted their articulations on their websites and made significant good faith efforts to comply with the legislation mandating that credit be given for all IB scores of 4 or higher.

However, the complexities of articulating IB subject, level, score and content are not to be underestimated. For that reason, there is much more variability among institutions in IB articulations than for AP. That variability extends to the number of subject-level-score combinations articulated and to the course articulations and credit awarded by individual institutions.

It is fair to say that International Baccalaureate articulation is, and will likely remain, a work in progress with individual institutions posting articulations in relationship to their score receipt experience.

Nonetheless, all institutions should include a clear policy statement with their articulation lists, indicating that credit toward graduation will be awarded for any score of 4 or higher in compliance with the legislation.

Institutions should review, on a rolling basis, IB score reports they receive and determine course articulations if not already posted.

Institutions should benchmark their credit and course policies against those of other institutions to determine outliers, particularly in cases where only elective credit is granted.

The ICCB and IBHE should regularly review institutional practices and keep listings and links up to date on their own websites

## Appendix B: Transfer Working Group Membership

First	Last	Title	Organization
Malinda	Aiello	State Director	Illinois Articulation Initiative
Stephanie	Bernoteit	Deputy Director for Academic Affairs	Illinois Board of Higher Education
Marcus	Brown	Senior Director for Academic Affairs & Student Services	Illinois Community College Board
Rachel	Cook	Associate Director of Advisement/Transfer Coordination	Heartland Community College
Marie	Donovan	Associate Professor of Teacher Education	Faculty Advisory Council
Ann		Program Director, Early Childhood Education Chair, Faculty Advisory Council, Illinois Board of Higher Education College of Education	
Delfina	Dornes	Director, Enrollment and Advising	Lewis and Clark Community College
Latrice	Eggleston Williams	Interim Vice President of Enrollment Management, Director, Office of Instructional Effectiveness & Research	Chicago State University
Melvin	Harrison	Director for Academic Affairs	Illinois Community College Board
Lisa	Helm	Director of the Undergraduate Academic Advising Center	Governors State University
Sean	Jensen	Director of Transfer Services	Elgin Community College
Anissa	Jones	Dean of Student Development	South Suburban College
Klonoski	Ed	Associate Vice Provost for Undergraduate Curriculum	Northern Illinois University
Dena	Lawrence	Project Coordinator	Illinois MyCreditsTransfer
Eric	Lichtenberger	Deputy Director for Information Management & Research	Illinois Board of Higher Education
Gretchen	Lohman	Senior Associate Director for Academic Affairs	Illinois Board of Higher Education
Holly	Martin	Chief Academic Officer	Illinois Eastern Community Colleges
Janet	Matheney	Dean of Student Services	Sauk Valley Community College
Maxeiner	Amy	Vice President for Instruction	Blackhawk College
Holly	Norton	Dean of Instruction/Chief Academic Officer	Spoon River College
Rick	Pearce	Provost and Vice President, Academic Affairs	Heartland Community College
Jess	Ray	University Registrar and Director of Veterans and Military Services	Illinois State University
Jonathan	Rosenthal	Consultant	Illinois Board of Higher Education
Amy	Spies	Assistant Director for Academic Affairs	Illinois Board of Higher Education
Laura	Strom	Registrar	Southern Illinois University Edwardsville
Dustin	Tarter	Associate Director, Office of Undergraduate Admissions	University of Illinois at Urbana-
Chris	Tweddle	Associate Professor of Mathematics, Associate Director of General Education	Governors State University
Nathan	Wilson	Deputy Director for Academic and Institutional Effectiveness	Illinois Community College Board
Tamara	Workman	Director Office of the Registrar	Southern Illinois University Carbondale
