

2022 Maine Healthcare Occupations Report

Prepared By:
Andrew Dawson, Senior Economic Research Analyst

Issued September 15th, 2022

Preface

The Maine Healthcare Occupations Report combines a variety of workforce statistics for the over 80,000 healthcare occupational professionals in the state. Sources of data used in this report include:

- 2021 Occupational Employment & Wage Statistics (OEWS) for Maine and the US
- Maine Quarterly Census for Employment & Wage (QCEW)
- 2020-2030 Maine Occupational Projections
- Maine Education & Attainment Research Navigation System (MaineEarns)
- US Census Bureau's Quarterly Workforce Indicators
- National Center of Education Statistics
- BLS Occupational Outlook Handbook

The distribution and employment mix of healthcare occupational workers by industry, the number of employed workers in each occupation, their respective wages, and occupational forecasts are included. Compensation in Maine's healthcare occupations is contrasted with US mean wages for the same occupations. Additional occupational information such as job descriptions and typical education requirements, schools in the state offering related educational programs and the number of program completers at each school by award type for each occupation may be found in the Healthcare Occupational Data Sheets at the end.

Table of Contents

Phlebotomists.....	85
Healthcare Support Workers, AO	86
Maine Post-Secondary Outcomes Report	87

DEFINITIONS

Healthcare Sector

For the purposes of this report the healthcare sector is defined as all establishments in the hospital, ambulatory care, nursing and residential care services and social assistance industries. This is the definition used by the North American Industry Classification System (NAICS) for the healthcare sector. As an economic sector is a conglomeration of industries involved in similar business activities; the healthcare sector also may properly be referred to as the healthcare & social assistance industries.

The NAICS defines the four healthcare subsectors as follows:

- Industries in the ambulatory health care services subsector provide health care services directly or indirectly to ambulatory patients and do not usually provide inpatient services. Health practitioners in this subsector provide outpatient services, with the facilities and equipment not usually being the most significant part of the production process.
- Industries in the hospitals subsector provide medical, diagnostic, and treatment services that include physician, nursing, and other health services to inpatients and the specialized accommodation services required by inpatients. Hospitals may also provide outpatient services as a secondary activity. Establishments in the Hospitals subsector provide inpatient health services, many of which can only be provided using the specialized facilities and equipment that form a significant and integral part of the production process.
- Industries in the nursing and residential care facilities subsector provide residential care combined with either nursing, supervisory, or other types of care as required by the residents. In this subsector, the facilities are a significant part of the production process, and the care provided is a mix of health and social services with the health services being largely some level of nursing services.
- Industries in the social assistance subsector provide a wide variety of social assistance services directly to their clients. These services do not include residential or accommodation services, except on a short-stay basis.

Healthcare Occupations

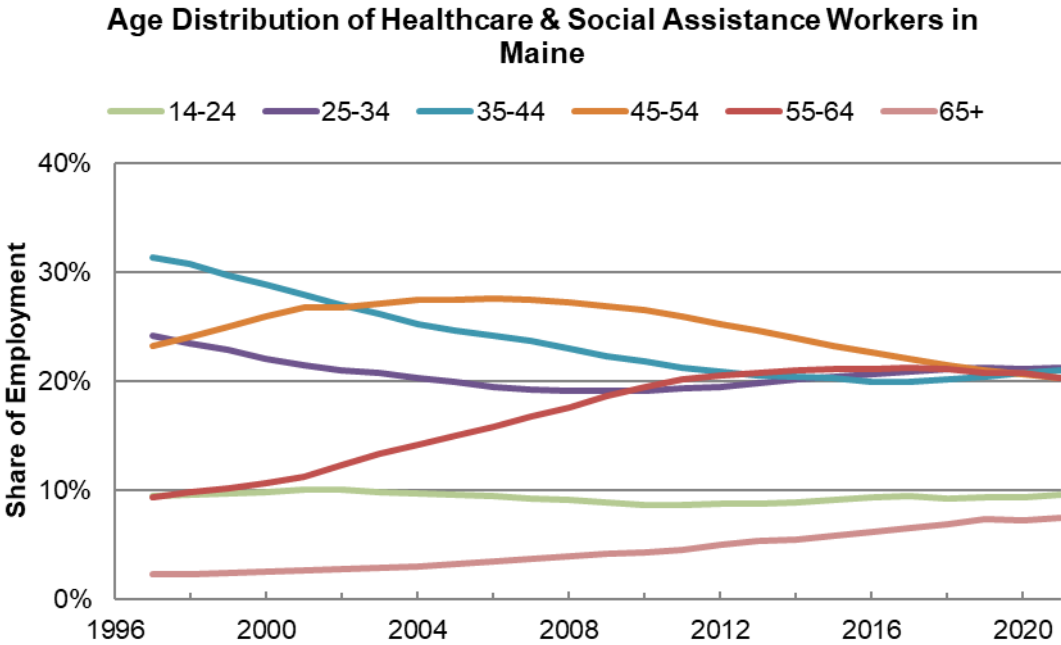

Healthcare occupations are defined in accordance with the 2018 Standard Occupational Classification (SOC) system. SOC is the basic occupational coding taxonomy used by all government statistical agencies. SOC disaggregates all healthcare occupations into two broad categories: healthcare practitioners and technical workers and healthcare support workers. Healthcare practitioners represent the highest levels of licensure in the medical field—doctors, dentists, registered nurses, and physical and occupational therapists are a representative sample of healthcare practitioners. The healthcare support worker category includes the lower levels of licensure—nursing aides, home health aides, physical therapist assistants, occupational therapist aides, etc.

DEMOGRAPHICS OF WORKERS IN HEALTHCARE

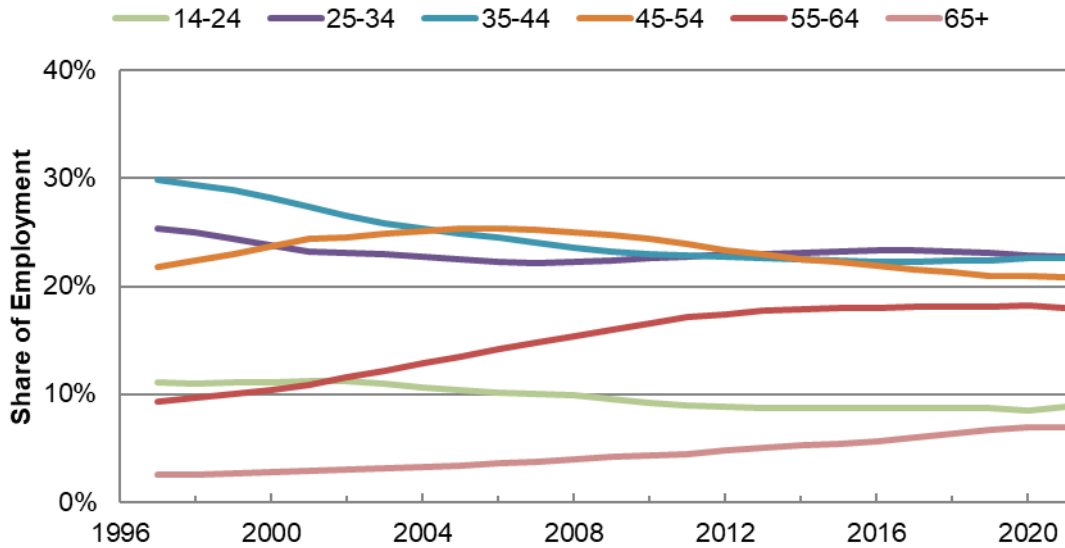

The following demographic data on the age, gender, race/ethnicity, and education attainment of workers in the healthcare & social assistance sector is produced from the US Census Bureau’s Quarterly Workforce Indicators (QWI). These demographics help provide context about the composition of the workforce in Maine, with the caveat that QWI data includes all job holders in the industry, not just those in healthcare-providing occupations. Overall, healthcare-providing occupations represent over 60 percent of the jobs in Maine’s healthcare & social assistance sector.

Distribution of Workers by Age

The share of workers in the 55-64 age range has nearly doubled in Maine over the last 20 years from 11 percent in 2001 to 20 percent in 2021. The share of workers aged 35-44, 29 percent, and 45-54, 26 percent, has dropped to 21 and 20 percent over the same timeframe, respectively. Compared to the US, Maine had a similar distribution of employment among age groups with a slightly higher share of workers in the 55-64 age range in 2021.

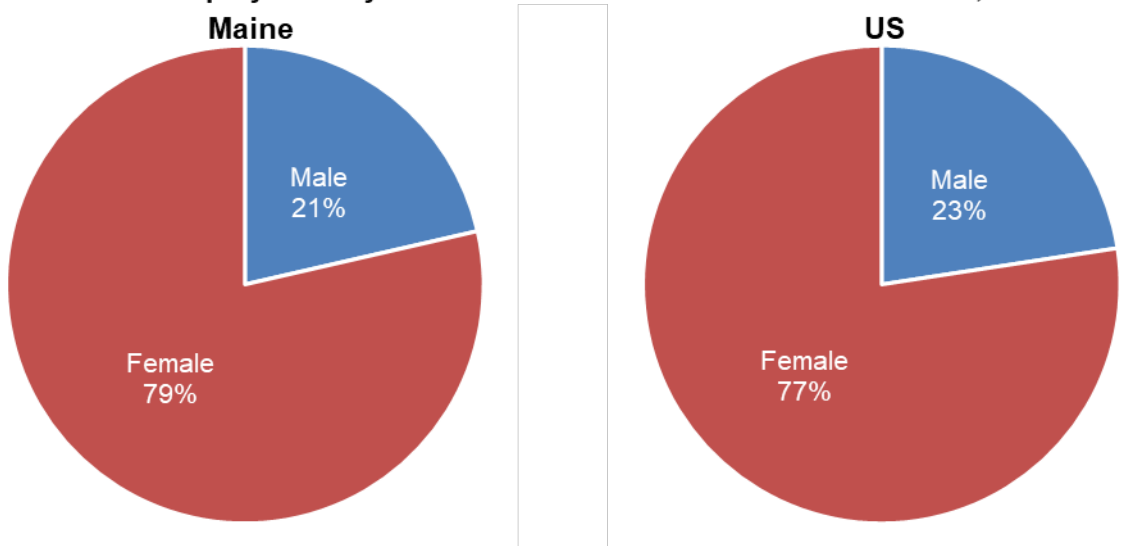

Age Distribution of Healthcare & Social Assistance Workers in US

Distribution of Workers by Gender

Women comprise the majority of job holders in Maine’s healthcare & social assistance sector, representing 79 percent of job holders in 2021. Women have consistently held about 80 percent of the jobs in this sector in Maine over the last 20 years. This is comparable to the US trend, as women held 77 percent of all healthcare & social assistance sector jobs in 2021.

Employment by Gender in Healthcare & Social Assistance, 2021

Distribution of Workers by Race/Ethnicity

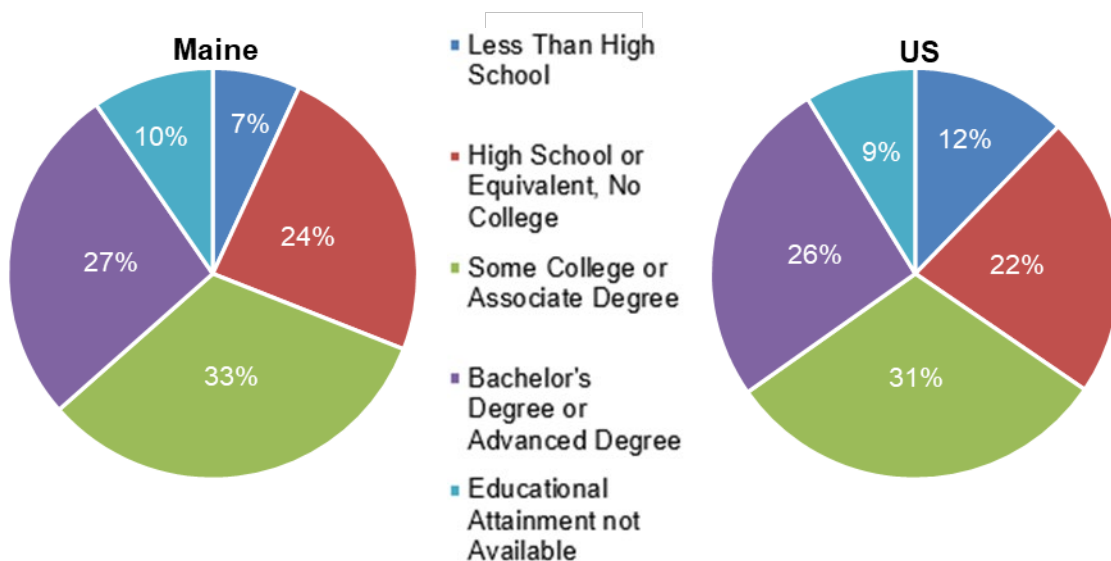

Job holders in Maine’s healthcare & social assistance sector are predominantly white (93 percent) and non-hispanic or latino (98 percent). For reference, white workers make up 94 percent of all job holders in Maine across all industry sectors. The overall US employment in this sector is more diverse with white workers making up only 71 percent of the total employment in the healthcare sector.

2021 Race & Ethnicity of Healthcare & Social Assistance Workers							
	Total	Race				Ethnicity	
		White Alone	Black or African American Alone	Asian Alone	All Other	Not Hispanic or Latino	Hispanic or Latino
Maine	103,809	93%	4%	2%	2%	98%	2%
US	19,798,644	71%	18%	8%	3%	85%	15%

Distribution of Workers by Educational Attainment

The majority of job holders in the healthcare & social assistance sector in Maine have an education attainment of at least some college or associate degree or higher (60 percent). Conversely, about 31 percent have an educational attainment of a high school degree or less. The overall mix in Maine is similar to that of the US. Most healthcare practitioner and technical workers require some college or an advanced degree, while many of the healthcare support occupations require a high school or equivalent credential.

Educational Attainment of Workers in Healthcare & Social Assistance, 2021

Distribution of Workers by Location

The distribution of the workforce plays a critical role in the population’s ability to access health services. According to the U.S. Department of Agriculture Economic Research Service, 40 percent of Mainers reside in rural areas and these populations have lower per capita incomes, higher rates of poverty and unemployment, and lower levels of education attainment. Conversely, the urban areas of Maine, which are home to the large hospital systems and a majority of the health workforce, offer better access and higher numbers of health workers per population.

Distribution of Maine's Health Workforce by County, 2021				
Area	Total Employment, Health Practitioners & Support Workers	Pct. (%) of Total	Pct. (%) of Population Living in Area	Number of Health Workers per 1,000 Residents
Androscoggin County	6,510	8.7%	8.1%	59
Aroostook County	3,790	5.1%	4.9%	57
Cumberland County	22,790	30.4%	22.2%	75
Franklin County	1,200	1.6%	2.2%	40
Hancock County	2,360	3.2%	4.1%	42
Kennebec County	7,940	10.6%	9.1%	64
Knox County	1,870	2.5%	3.0%	46
Lincoln County	1,230	1.6%	2.6%	34
Oxford County	1,830	2.4%	4.3%	31
Penobscot County	10,740	14.3%	11.1%	70
Piscataquis County	750	1.0%	1.3%	44
Sagadahoc County	770	1.0%	2.7%	21
Somerset County	1,810	2.4%	3.7%	36
Waldo County	1,100	1.5%	2.9%	28
Washington County	1,240	1.7%	2.3%	40
York County	6,470	8.6%	15.6%	30
Statewide	74,860	*	*	55
US	15,391,410	*	*	46

Maine Department of Labor, Occupational Employment & Wage Statistics

*Some data is suppressed per BLS' data quality and confidentiality standards. In disaggregating the workforce by county, we can account for 96.7% of statewide employment.

Cumberland County has the highest share of total health practitioners & support workers in the state at over 30 percent, despite having only 22 percent of the population residing in the county. This leads to a disproportionately larger number of health workers per population (75 per thousand residents) relative to the statewide average of 55. Conversely, counties like York, Waldo, Sagadahoc, Oxford, and Lincoln are all well-below the statewide average. Despite the low share of healthcare workers in these areas, many still have good access to health services available in a neighboring county.

For example, Sagadahoc County has the lowest number of health workers per thousand residents at only 21. However, each of the neighboring counties contains a hospital system that is in close proximity to the cities and towns of Sagadahoc. Depending on their location within Sagadahoc, residents can travel west for services in Brunswick, north for services in Lewiston or Augusta, or east for services in Damariscotta. Despite the low share of health workers within the borders of Sagadahoc, there is still ample access to health services for these residents.

HEALTHCARE OCCUPATIONS IN MAINE

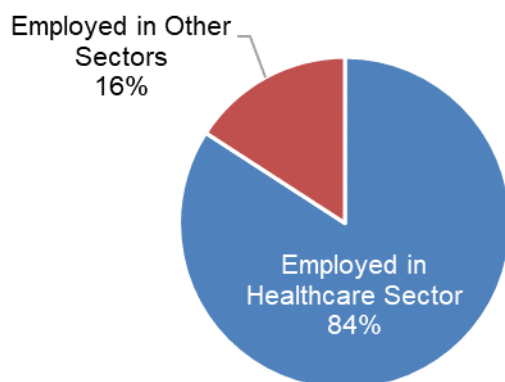

The vital role played by healthcare occupational workers in delivering medical care throughout the state highlights the importance of understanding employment and wage characteristics of these workers. The Occupational Employment and Wage Statistics (OEWS) program, a cooperative effort between the Bureau of Labor Statistics (BLS) and CWRI, produces employment and wage estimates for over 800 occupations and is the best available source of data in this respect. These estimates are available at the national, state, metropolitan and nonmetropolitan area levels, and do not include non-payrolled workers, independent contractors, and owners of unincorporated firms.

The following data on the distribution and mix of healthcare occupational employment by industry, occupational employment statistics, wage statistics and employment forecasts were produced by CWRI's OEWS program. Occupational job descriptions and minimum education requirements, schools in Maine offering educational programs for each occupation, the number of program completers by school and degree are available in the Healthcare Occupations Data Sheets.

Healthcare Occupations by Industry

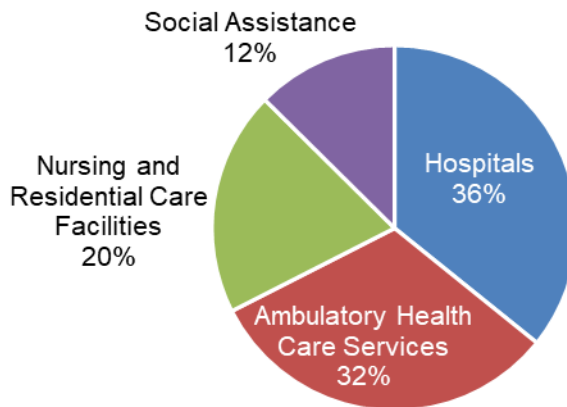

There were an estimated 74,860 people working in payroll-covered healthcare occupations in Maine in 2021. Approximately 84 percent of these healthcare workers were employed in the healthcare sector (ambulatory care, hospitals, nursing and residential care facilities, social assistance industries), while the remaining 16 percent were employed in non-healthcare industries.

**Distribution of Healthcare Occupational Employment by Sector
Maine, 2021**

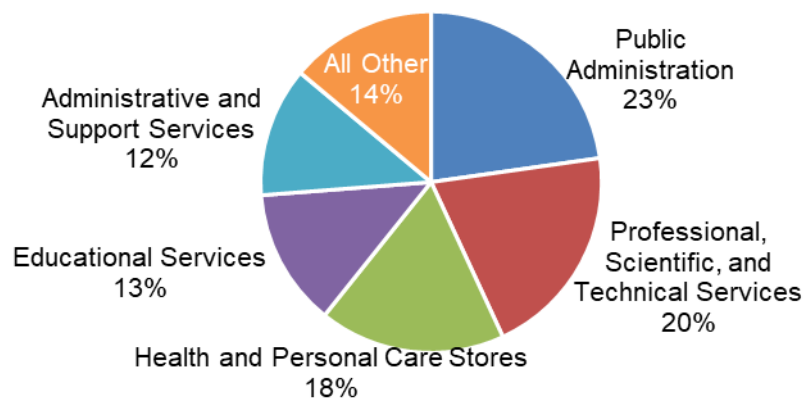

Of the 84 percent of the state’s healthcare occupational workforce that was employed in the healthcare sector, 36 percent were employed at hospitals, 32 percent in ambulatory care, 20 percent at nursing and residential facilities and 12 percent were employed in social assistance.

**Distribution of Healthcare Employment In Healthcare Industries
Maine, 2021**

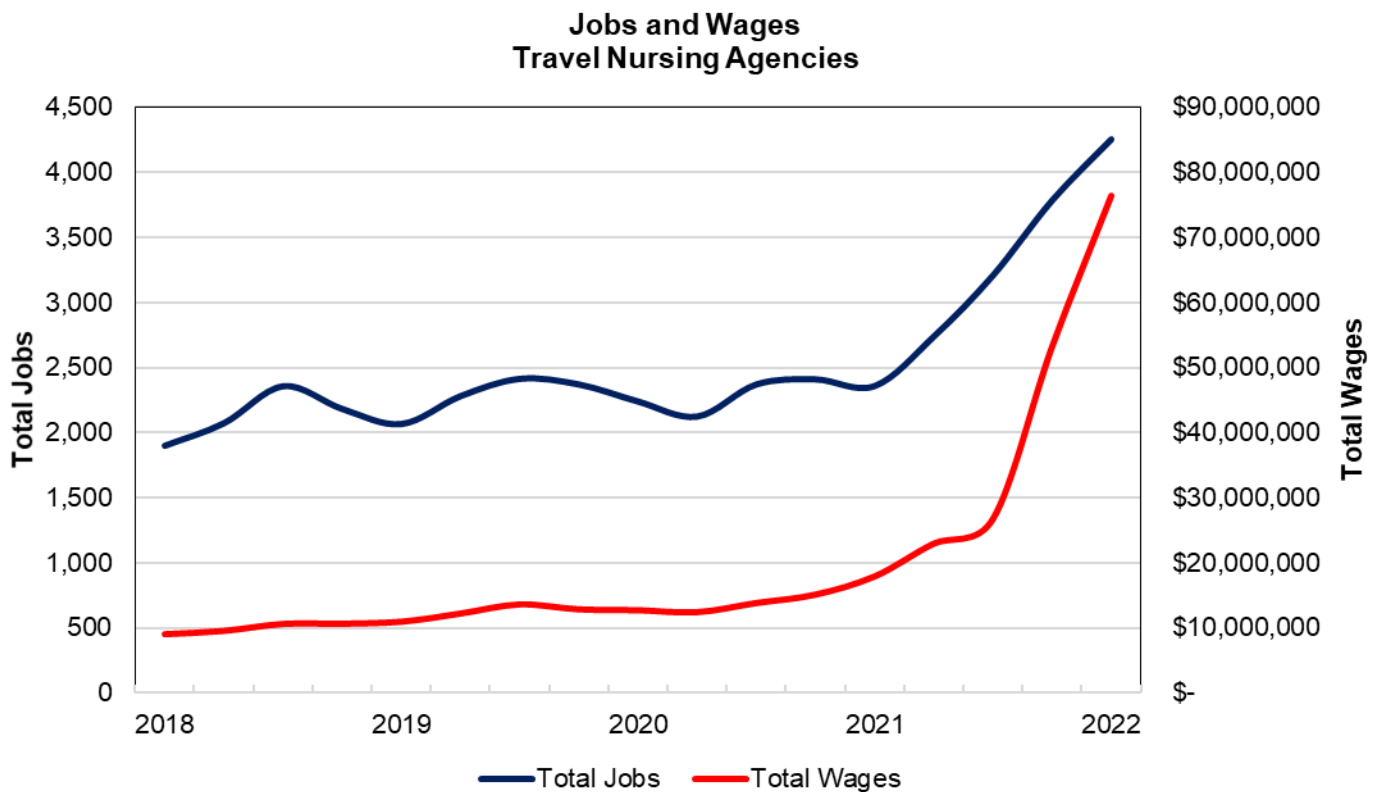

Of the 16 percent of Maine’s healthcare occupational workers that were not employed in the healthcare sector, 23 percent worked in public administration, 20 percent in professional, scientific and technical services, 18 percent in health and personal care stores, 13 percent in education services, 12 percent in administrative and support services, and 14 percent in other industries (manufacturing, management, personal services, etc.).

**Distribution of Healthcare Employment in Non-Healthcare Industries
Maine, 2021**

Throughout the pandemic as healthcare providers have had to quickly adapt to the public health emergency, many providers have filled staffing needs by contracting with travel nursing agencies. Traveling nurses typically work on short term contracts in a particular area of need. While travel nursing arraignment have existed for decades, there has been a noticeable increase in reported employment by establishments who employ them in Maine. Due to the structure of the industrial classification system, these employers are classified under the administrative support services industry sector.

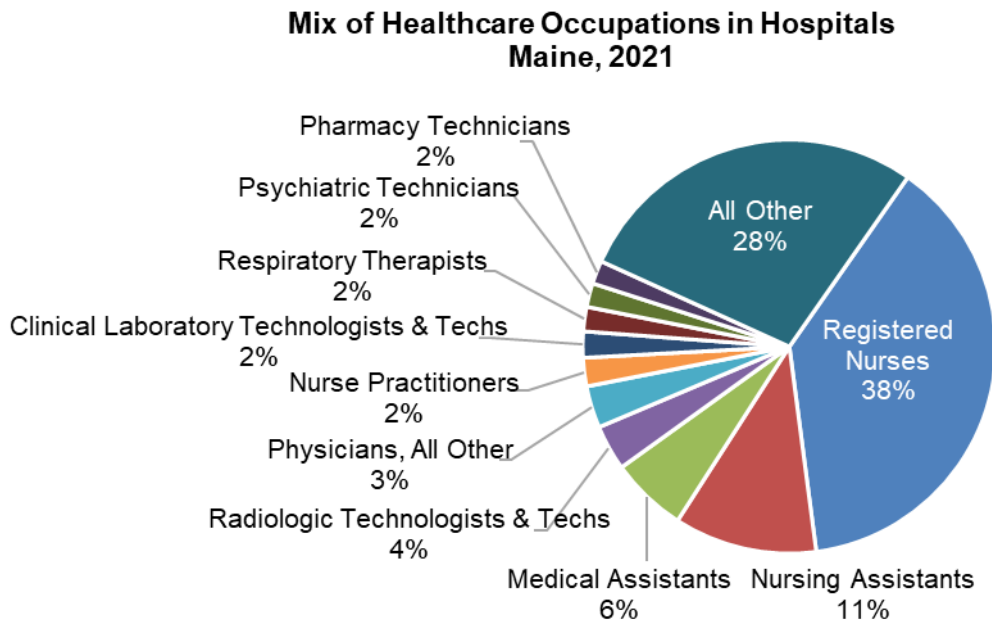

Using a list of licensed travel nursing agencies provided by the Maine Department of Health & Human Services, matches were made to unemployment insurance wage records to examine the employment and wage trends at these organizations. Approximately 65% of the agencies were able to be directly matched and their data aggregated for total jobs and total wages paid out by quarter going back to 2018. Employment in these establishments was relatively stable from 2018 through 2020 with about 2,100 – 2,300 jobs, however, by the first quarter of 2022 the employment totals had increased to around 4,250. Total wages reported increased at an even faster rate, more than tripling from the first quarter of 2021 (approximately \$18 million) to over \$76 million in the first quarter of 2022.

It should be noted that some of these individuals could still be working in traditional settings such as hospitals but no longer as a direct employee of that organization. It's also unknown the exact occupational mix of these workers (registered nurses, licensed nurses, nurse practitioners, or nursing assistants). More data and further analysis is needed over time to better understand if this is a cyclical or structural change in the way these occupations are employed.

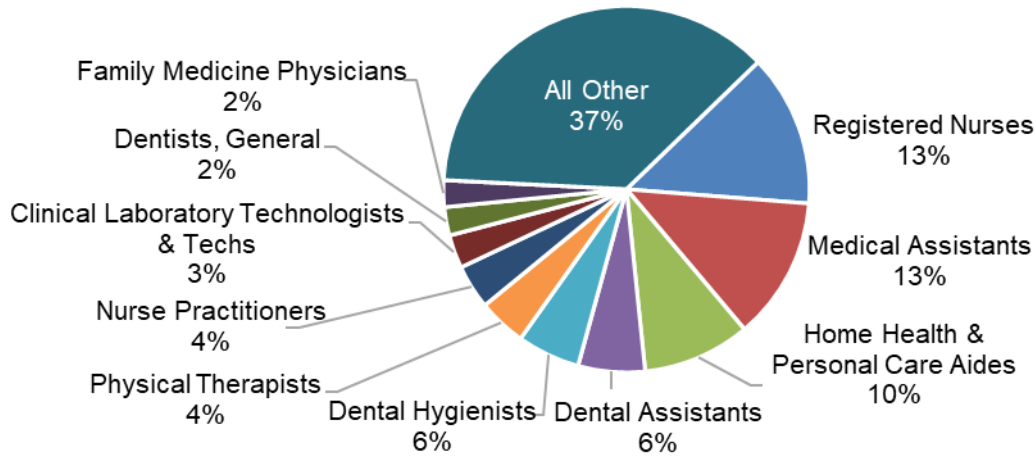

Occupational Mix within Healthcare Industries

It is useful to understand the healthcare occupational employment mix within Maine's healthcare and social assistance industries. The following chart illustrates that registered nurses (RNs) were, by far, the healthcare occupation in greatest number at hospitals in Maine in 2021. Nursing assistants and medical assistants represented the second and third largest healthcare occupations working at Maine hospitals.

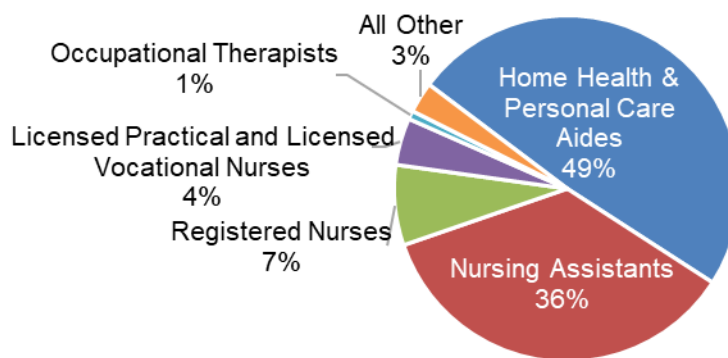

RNs, medical assistants, home health and personal care aides, dental assistants and hygienists represented nearly 50 percent of healthcare occupational employment within Maine’s ambulatory healthcare services industry in 2021.

**Mix of Healthcare Occupations In Ambulatory Healthcare Services
Maine 2021**

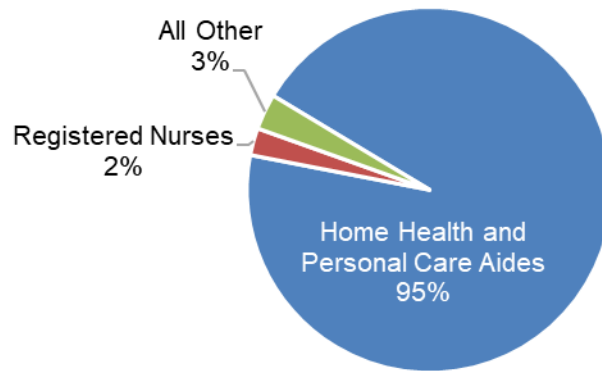

Home health and personal care aides and nursing assistants represented 85 percent of total healthcare occupational employment in the nursing and residential care facility industry in 2021. Registered nurses and licensed practical & vocational nurses represented 7 and 4 percent of industry employment, respectively.

**Mix of Healthcare Occupations in Nursing & Residential Care Facilities
Maine, 2021**

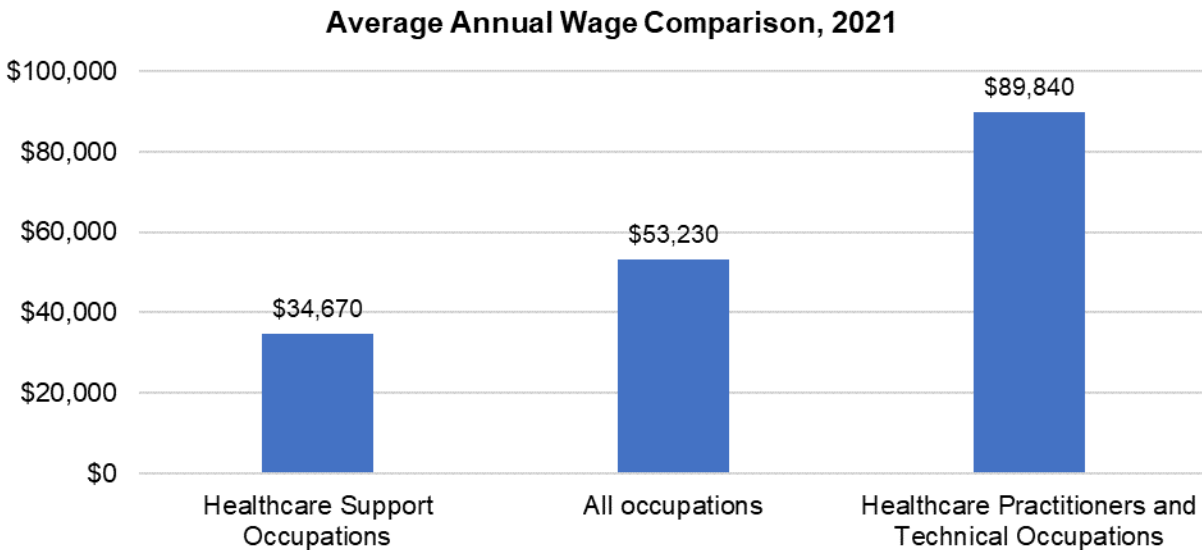

Healthcare occupations represented approximately 40 percent of total employment within Maine’s social assistance industry in 2021. The largest healthcare occupation employed in the social assistance industry—home health and personal care aides, represented 95 percent of healthcare occupational employment and 38 percent of total employment in the industry.

**Mix of Healthcare Occupations in Social Assistance
Maine, 2021**

Occupational Wage Statistics

The average healthcare practitioner in Maine earned \$89,840 in 2021, a substantial premium to the statewide average wage of \$53,230. Healthcare support workers earned \$34,670 on average, approximately 35 percent less than the average statewide wage for all occupations (including non-healthcare occupations). The substantial education and training requirements for doctors, dentists and other healthcare practitioners are a significant contributing factor to the premium wages earned in these occupations.

Wage statistics for individual healthcare occupations in Maine and the US are detailed within the following Healthcare Occupational Data Sheets.

HEALTHCARE OCCUPATIONAL DATA SHEETS

Occupations are sorted by their 6-digit SOC code located before the occupational title. For each occupation the following is provided:

- Occupation description
- Sample of reported job titles
- Educational Requirement*
- Occupational Outlook (2020-2030 Projections)
- Occupational Wages, 2021 Maine & USA^
- Maine Schools and Program Completers by Degree**

*Source: Text is taken from the BLS Occupational Outlook Handbook from the BLS website.

**Source: National Center for Education Statistics. Data is reported by institution and is subject to revisions. Limitations of this source include reporting inconsistencies, errors, and CIP changes over time.

^Entry Level wage is calculated from the lower one-third of the data set.

Note: Schools and Program Completers by Degree are matched to occupations using a Classification of Instructional Programs (CIP) to SOC crosswalk. Not all occupations have CIP-matched programs reported, however, other instructional programs may still be relevant to that occupation. Occupations without a direct match or have no CIP-matched programs reported are denoted with “**NA.**”

List of school abbreviations used in tables:

- CMCC – Central Maine Community College
- EMCC – Eastern Maine Community College
- KVCC – Kennebec Valley Community College
- NMCC – Northern Maine Community College
- SMCC – Southern Maine Community College
- UMA – University of Maine at Augusta
- UMF – University of Maine at Farmington
- UMFK – University of Maine at Fort Kent
- UMM – University of Maine at Machias
- UMO – University of Maine at Orono
- UMPI – University of Maine at Presque Isle
- UNE – University of New England
- USM – University of Southern Maine
- WCCC – Washington County Community College
- YCCC – York County Community College

29-1011 – Chiropractors

Occupation Description: Assess, treat, and care for patients by manipulation of spine and musculoskeletal system. May provide spinal adjustment or address sacral or pelvic misalignment.

Sample of reported job titles: Chiropractic Doctor, Chiropractic Physician

Educational Requirement: Chiropractors typically need a Doctor of Chiropractic (D.C.) degree and a state license. D.C. programs typically take 4 years to complete and require at least 3 years of undergraduate education for admission.

Occupational Outlook:

2020 Projected to 2030						
SOC Code	Occupation Title	Jobs		Job Change and Annual Openings		
		2020	Projected 2030	Net	Percent	Annual Openings
29-1011	Chiropractors	335	327	-8	-2.39%	7

Occupational Wages:

2021 Wages					
Maine				US	
Entry Level		Average		Average	
Hourly	Annual	Hourly	Annual	Hourly	Annual
\$16.84	\$35,030	\$34.41	\$71,580	\$39.06	\$81,240

Schools and Program Completers by Degree: NA

29-1020 – Dentists

Occupation Description: Examine, diagnose, and treat diseases, injuries, and malformations of teeth and gums. May treat diseases of nerve, pulp, and other dental tissues affecting oral hygiene and retention of teeth. May fit dental appliances or provide preventive care. Includes “Dentists, General” (29-1021), “Oral and Maxillofacial Surgeons” (29-1022), “Orthodontists” (29-1023), “Prosthodontists” (29-1024), and “Dentists, All Other Specialists” (29-1029).

Sample of reported job titles: Family Dentist, Orthodontist, Prosthodontist

Educational Requirement: Dentists must be licensed in the state in which they work. Licensure requirements vary by state, although candidates usually must graduate from an accredited dental program and pass written and clinical exams.

Occupational Outlook:

2020 Projected to 2030						
SOC Code	Occupation Title	Jobs		Job Change and Annual Openings		
		2020	Projected 2030	Net	Percent	Annual Openings

Schools and Program Completers by Degree:

CIP Code	Title	Program Type	School	2016	2017	2018	2019	2020
51.0401	Dentistry.	Doctor's degree - professio..	UNE	0	62	63	63	61

29-1031 – Dietitians and Nutritionists

Occupation Description: Plan and conduct food service or nutritional programs to assist in the promotion of health and control of disease. May supervise activities of a department providing quantity food services, counsel individuals, or conduct nutritional research.

Sample of reported job titles: Clinical Dietitian, Dietitian, Nutritionist, Pediatric Dietician, Public Health Dietitian, Public Health Nutritionist, Research Dietitian, Sports Nutritionist, Therapeutic Dietitian

Educational Requirement: To enter the occupation, dietitians and nutritionists typically need at least a bachelors degree. They also typically are required to have supervised training through an internship.

Occupational Outlook:

2020 Projected to 2030						
SOC Code	Occupation Title	Jobs		Job Change and Annual Openings		
		2020	Projected 2030	Net	Percent	Annual Openings

Schools and Program Completers by Degree:

CIP Code	Title	Program Type	School	2016	2017	2018	2019
51.3199	Dietetics and Clinical N..	Associate's degree	SMCC	9	7	0	0

29-1041 – Optometrists

Occupation Description: Diagnose, manage, and treat conditions and diseases of the human eye and visual system. Examine eyes and visual system, diagnose problems or impairments, prescribe corrective lenses, and provide treatment. May prescribe therapeutic drugs to treat specific eye conditions.

Sample of reported job titles: Doctor of Optometry

Educational Requirement: Optometrists typically need a Doctor of Optometry (O.D.) degree and a license to practice in a particular state. O.D. programs take 4 years to complete, and most students have a bachelors degree before entering such a program.

Occupational Outlook:

2020 Projected to 2030						
SOC Code	Occupation Title	Jobs		Job Change and Annual Openings		
		2020	Projected 2030	Net	Percent	Annual Openings

\$40.57	\$84,390	\$65.10	\$135,410	\$60.31	\$125,440

Schools and Program Completers by Degree: NA

29-1051 – Pharmacists

Occupation Description: Dispense drugs prescribed by physicians and other health practitioners and provide information to patients about medications and their use. May advise physicians and other health practitioners on the selection, dosage, interactions, and side effects of medications.

Sample of reported job titles: Apothecary, Clinical Pharmacist, Druggist, Hospital Pharmacist, Registered Pharmacist

Educational Requirement: Pharmacists must have a Doctor of Pharmacy (Pharm.D.), a 4-year professional degree. They must also be licensed, which requires passing two exams.

Occupational Outlook:

2020 Projected to 2030						
SOC Code	Occupation Title	Jobs		Job Change and Annual Openings		
		2020	Projected 2030	Net	Percent	Annual Openings

Occupational Wages:

2021 Wages					
Maine				US	
Entry Level		Average		Average	
Hourly	Annual	Hourly	Annual	Hourly	Annual
\$45.00	\$93,600	\$60.83	\$126,520	\$60.43	\$125,690

Schools and Program Completers by Degree:

CIP Code	Title	Program Type	School	2016	2017	2018	2019	2020
51.2001	Pharmacy.	Doctor's degree - professional practice	Husson	55	54	46	41	50
			UNE	88	87	99	92	70

29-1071 – Physician Assistants

Occupation Description: Provide healthcare services typically performed by a physician, under the supervision of a physician. Conduct complete physicals, provide treatment, and counsel patients. May, in some cases, prescribe medication. Must graduate from an accredited educational program for physician assistants.

Sample of reported job titles: Anesthesiologist Assistant, Certified Physician's Assistant, Family Practice Physician Assistant, Orthopaedic Physician Assistant, Orthopedic Physician Assistant, Pediatric Physician Assistant, Radiology Practitioner Assistant

Educational Requirement: Physician assistants typically need a masters degree from an accredited educational program. All states require physician assistants to be licensed.

Occupational Outlook:

2020 Projected to 2030						
SOC Code	Occupation Title	Jobs		Job Change and Annual Openings		
		2020	Projected 2030	Net	Percent	Annual Openings
29-1071	Physician Assistants	887	1,085	198	22.32%	74

Occupational Wages:

2021 Wages					
Maine				US	
Entry Level		Average		Average	
Hourly	Annual	Hourly	Annual	Hourly	Annual

\$66.73	\$138,800	\$93.23	\$193,920	\$76.15	\$158,380

Schools and Program Completers by Degree: NA

29-1122 – Occupational Therapists

Occupation Description: Assess, plan, and organize rehabilitative programs that help build or restore vocational, homemaking, and daily living skills, as well as general independence, to persons with disabilities or developmental delays. Use therapeutic techniques, adapt the individual’s environment, teach skills, and modify specific tasks that present barriers to the individual.

Sample of reported job titles: Occupational Therapist, OT, Registered Occupational Therapist

Educational Requirement: Occupational therapists typically need a masters degree in occupational therapy. All states require occupational therapists to be licensed.

Occupational Outlook:

2020 Projected to 2030						
SOC Code	Occupation Title	Jobs		Job Change and Annual Openings		
		2020	Projected 2030	Net	Percent	Annual Openings
29-1122	Occupational Therapists	875	929	54	6.17%	54

Occupational Wages:

MAINE POST-SECONDARY OUTCOMES REPORT

The Maine Post-Secondary Outcomes report, MPSO, provides information on employment and wage outcomes for Maine workers who graduated from partnering post-secondary institutions. Metrics available include number of graduates, percentage who are employed in Maine, median wages (among graduates working full-time), industry of employment and average age at graduation. These outcomes are available by school, credential, area of study, outcome year and industry. This data comes from the Maine Education & Attainment Navigation System (MaineEarns).

The following MPSO report contains median wage outcome data for healthcare-related completers at three, five, and seven-years after graduation that are currently working full-time in the healthcare & social assistance sector of Maine. This data doesn't include completers who may be working in a different industry, state, part-time or in a non-payrolled structure like self-employed. This data is collected differently from the completions data that is included in the Health Occupational Data sheets and is only available for the current partnering institutions, the University of Maine System and the Maine Community College System. For more information, please visit <https://www.maine.gov/labor/cwri/mpso/index.html>.
