Description of Request

--

Proposed Rows of Table	Proposed Columns of Table

I have attached a table shell of the request with this form as is required before it is reviewed. (A table shell of the table you proposed, completed with no data in it.)

I understand:

- Special tabulations are requests to make previously unpublished data tables public and, due to CIPSEA (Confidential Information Protection and Statistical Efficiency Act) and Title 7, Section 2276, USDA NASS is required to ensure that no information that could be used to identify or closely approximate data for an individual farm, establishment, or enterprise to be released to the public.
- A fee is required for completing a special tabulation. An estimate of the cost will be provided to the requestor and payment received from the requestor before work commences.
- All special tabulation requests are subject to review and approval by the Data Access and Disclosure Review Board.
- The timeline for approved special tabulation requests could change for reasons including but not limited to the complexity of the request, the number of requests, and other operational responsibilities that take priority over special tabulations.
- The results proposed may not be able to be provided in the format originally requested.
- Special tabulations are considered public releases and copies of a completed special tabulation will be available to the public.
