Subject: WRLCM Description Appendix ROC_AR_DPP

Hi Eric and Ann-Marie,

I have attached a draft version of the write up. I included most suggested edits by Ann-Marie, which were incredibly helpful. It would be good if it could get one more good review before we send it out, and please let me know if you find anything.

- There was one question regarding changing the proportion of fish entering the floodplain from P_FP to P_TF,FP. These proportions are used for multiple life stages though, not just tidal fry, so I kept the original notation. Please let me know if there are additional questions on that topic.

Thanks and happy Friday to you both,

Noble
