

Room to Improve:

Underinvestment in low-skill workers

According to the 2012/2014 Program for the International Assessment of Adult Competencies (PIAAC), about 21 million U.S. employees—15 percent of working 16- to 65-year-olds—have low literacy skills. These are workers who are likely to struggle with performing basic tasks, such as reading a label on a medicine bottle, navigating a simple digital text to find specific information, or drawing a conclusion from information in a printed text.

Low-skill workers are less likely than other workers to participate in job-related training¹

Two out of five **low-skill employees** participated in job-related training in the previous year.

In comparison, three out of five **mid- to high-skill employees** participated.

Over half of low-skill workers were either too busy or could not afford participating in job-related training

Two of the most frequently cited reasons for not taking job-related training were...

¹ Interpret data with caution.
[‡] Reporting standards not met.

¹ Job-related training includes distance learning courses, seminars or workshops, on the job training, and other nonformal learning activities. These learning activities could be offered on or off the work site.

Employees find job-related training useful

Training helps low-skill workers' job performance. Among those who received job-related training in the previous year...

Some low-skill workers cover the full cost of their job-related training

To question, “Did an employer or prospective employer pay for tuition or registration, exam fees, expenses for books, or other costs?” the low-skilled workers answered...

Everyone benefits from investing in education and training

BUSINESSES

Businesses that provide support for ongoing training and learning opportunities can benefit from **more productive workers, higher employee satisfaction, lower turnover, and greater flexibility to adopt new technologies more quickly.**

WORKERS

Ongoing training can result in **improved job performance** and can provide low-skilled workers with **more opportunities for promotion and higher pay.**
