If you can dream it,  
**YOU CAN DO IT**

- Costuming
- Calligraphy
- Music
- Cooking
- Weaving
- Blacksmithing
- Brewing
- Pottery
- Woodworking
- Jewelry Making
- And Much, Much More!

## ARTS & SCIENCES IN THE SCA

Society  
for Creative  
Anachronism

# ANYTHING IS POSSIBLE

I love Seeing the look of awe and joy when they see the scroll made for their award or order .

-Geirráðr, Northshield

It is exciting to have so many outlets for creativity and research. I love seeing what others are interested in and creating!

-Margaret, An Tir

I love the interplay between the medieval and modern that can occur. You can take your modern hobbies and graft them onto medieval ones and vice versa. I became a better modern cook by studying medieval cookery because the latter requires you to really know your ingredients.

-Morina, Ansteorra

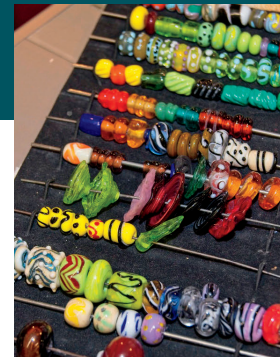

If it was done anywhere in the world prior to 1650, someone in the SCA is recreating it. Join us in discovering something old that is new again.

# TRY SOMETHING NEW

"I love how many total strangers are willing to teach me a new art for free or just the cost of materials. That's an amazing amount of generosity."

-Katalina, Ansteorra

I love that you can follow an art as far as you want. You can just try lots of things or fully research a topic. I love that some SCA members have gone from trying something out to making discoveries and publishing scholarly papers.

-Marion, Outlands
