

Dear UM Faculty,

A reminder, from the Mansfield Library, that changes to the Elsevier ScienceDirect ejournal package went into effect on January 1, 2024. As a result, numerous journals are not immediately available on the ScienceDirect publisher site. See [Postcancellation access to Elsevier ScienceDirect articles](#) for information about the changes. Journals with the highest usage from the past several years continue to be immediately available. Options for obtaining articles from cancelled journals include a rapid article delivery service called Article Galaxy Scholar (AGS) that fulfills requests almost immediately.

A revised and updated [Library Guide to Finding Articles](#) is available to assist students and faculty with efficiently finding and accessing journal articles through a variety of options including: AGS, OneSearch, library databases, Interlibrary Loan, LibKey Nomad (an open access browser plugin), Google Scholar, and directly from authors.

If you have questions or would like to communicate with a library representative about resources, please email library.serials@umontana.edu.
