Scattered thunderstorms produced heavy rain and isolated flooding during the afternoon of August 2nd. (IL-Z014) COOK 0 08/03/20 16:00 CST Rip Current 08/03/20 16:00 CST Direct Fatalities: M15IW A 15 year old boy went swimming with friends in Lake Michigan near Diversey Harbor. The boy was swept away from shore by high waves and went missing. His body was recovered several days later. Waves at the Wilmette buoy were around 7 feet. OGLE COUNTY --- 0.7 NNW FORRESTON [42.13, -89.59], 0.9 NNE FORRESTON [42.13, -89.57] 08/10/20 13:15 CST 0 Thunderstorm Wind (EG 87 kt) 08/10/20 13:20 CST 0 Source: Newspaper 5 Straight line winds gusting to 100 mph hit the town of Forreston producing widespread tree and power line damage. Tree and power line damage occurred across 48 blocks of the village and structural damage occurred across 13 blocks. Several mobile homes were damaged or destroyed in two mobile home parks and five people were injured. At least 50 people were displaced. Significant damage occurred to a large metal building near a gas station with associated debris blown toward the northeast. The gas station had its heating and cooling unit ripped off the roof, leaving a hole in the roof. A cinder block wall was blown out of the east side of a building causing minor damage to a parked semi truck. A garage partially collapsed from a fallen tree. Several other roofs suffered some damage from falling tree limbs. A car was damaged by a falling tree limb. LEE COUNTY --- 0.4 WNW HARMON [41.72, -89.56] 08/10/20 13:25 CST 0 Thunderstorm Wind (EG 70 kt) 08/10/20 13:25 CST n Source: Trained Spotter Several tree limbs were blown down. Exterior siding of a house was peeled away. During the late morning through the afternoon of Monday August 10th, a line of intense thunderstorms known as a derecho brought widespread severe wind damage across lowa, northern Illinois and northern Indiana.

In northwest Indiana alone, the winds downed hundreds of trees, as well as caused damage to homes, businesses and infrastructure. There were two injuries reported in northwest Indiana within the NWS Chicago/Romeoville County Warning Area (CWA) due to falling trees. It was estimated that over 200,000 customers lost power at the height of the derecho across all of northern Indiana. While much of the damage was due to straight line winds, there was also one tornado documented in northwest Indiana.

The combination of high moisture, explosive instability and very strong atmospheric wind flow for mid-summer had developed quickly over the Corn Belt region on the morning of August 10th. This resulted in a progressive, well-organized complex of storms for hundreds of miles and at times traveling nearly 70 mph. After bringing extensive damage from extreme wind speeds in lowa that morning, the damage transitioned across northern Illinois from widespread wind damage to narrow, brief and intense swaths associated with compact circulations within the thunderstorm line, some of which were associated with tornadoes.

Direct Fatalities: M16IW, M18IW, M21IW

A group of 5 teens were swimming in Lake Michigan near Portage Riverwalk when waves pulled them under. A good Samaritan riding a jet ski helped pull two swimmers out. Two others managed to swim out of the currents. One of the swimmers pulled out of the water, an 18 year old male, was taken to a local hospital and died a few days later. The body of the 5th and missing swimmer, a 16 year old boy, was found the next day. Waves were around 4 feet.

In a separate incident, a 21 year old male was rescued off Portage Beach after being underwater for an extended period. He had gone missing while swimming in Lake Michigan. He was taken to a local hospital where he died a few hours later. Rescuers received many calls for swimmers struggling in Lake Michigan on August 16th.
