Location Date/Time Deaths & **Event Type and Details** Property & Injuries Crop Dmg Damage occurred on Keslinger Road about a half mile east of Francis Road. There were five utility poles down with several power lines broken and lying in the street. Additionally, about twenty feet west of the intersection, there was also some damage to the power lines, but no poles down or lines broken. The orientation of the fallen poles was consistent with the lean of several areas of brush along the road and tree branches of a nearby tree, and were indicative of southerly straight line winds associated with a microburst. KANE COUNTY --- 2.6 SSE VIRGIL [41.91, -88.52], 2.1 SSE VIRGIL [41.92, -88.51] 0.10M 10/26/10 05:55 CST Tornado (EF1, L: 0.93 mi, W: 20 yd) 10/26/10 05:57 CST 0 Source: NWS Storm Survey The tornado that was northwest of Elburn touched down in a corn field about one mile north of Route 38, west of Francis Road. The tornado closely followed Francis Road and was on the ground for about \% of a mile. At the max width, the tornado was about 20 yards wide. The path touched three farmsteads and one home. The first farmstead that was affected sustained high end EF0 damage. An old garage and a small barn were leveled on the property, the roof was damaged on another building, and the trees on the property also sustained damage. There were several tree branches down around the property, and the trunk of a healthy pine tree was completely snapped. The second farmstead affected was located about a half mile up Francis Road. A temporary storage structure on the property was not constructed with any sort of wood or metal covering, but a heavy duty tarp-like material, heavily secured to the metal skeleton. The tarp was torn away from most of the metal structure, but still remained attached at one end. Several other buildings on the property, which were permanent, remained undamaged. The third and final farmstead affected was the most heavily affected area along the tornado's path. The farmstead was located about a quarter mile up Francis Road. Two large barns and one grain bin were completely destroyed on this property, and a telephone pole was completely snapped at the base. IROQUOIS COUNTY --- WATSEKA [40.78, -87.73] 10/26/10 05:58 CST 0 Thunderstorm Wind (EG 50 kt) 10/26/10 05:58 CST 0 Source: Law Enforcement Tree limbs and power lines were blown down. Record setting low pressure over Minnesota produced high winds across northern Illinois on October 26, behind a strong cold front which swept across the state during the morning. The high winds caused around 200,000 Commonwealth Edison customers to lose power. Five hundred flights were canceled at O'Hare Airport. The high winds blew down tree limbs and power lines across northern Illinois.

Some peak wind gusts included; 71 mph near Dixon in Lee County, 62 mph at Waukegan Airport in Lake County, and 58 mph at Peru in LaSalle County.

Damage reports included; 448 reports of trees damaged in Chicago as well as many traffic lights, street lights and poles; wind blew a
