              Meteorological Development Laboratory

Subject: Updated: Migration of All Real-time LAMP and Gridded LAMP  
Webpages and One Storm Surge Webpage to New Web Server: Effective on or  
about June 10, 2024

Updated to change the effective date from May 22 to on or about June 10,  
2024.

On or about June 10, 2024, the NWS Meteorological Development Laboratory  
(MDL) Decision Support Division (DSD) will migrate A) all real-time  
Localized Aviation Model Output Statistics (LAMP) and Gridded LAMP (GLMP)  
webpages and B) one storm surge webpage to a new web server, and will  
discontinue a legacy page that displays LAMP station forecast images.

The web server that currently hosts LAMP, GLMP, and storm surge web  
products is scheduled to be decommissioned in June 2024. These pages are  
being migrated to a new web server prior to the decommissioning, and many  
URLs will change as a result of the migration. A document that lists the  
main LAMP, GLMP, and storm surge webpages that are being migrated to the  
new web server, the current URL for each page, and the corresponding new  
URL can be viewed at:

[https://vlab.noaa.gov/documents/6609493/7858387/Gate MDL URL Transition Document.pdf](https://vlab.noaa.gov/documents/6609493/7858387/Gate%20MDL%20URL%20Transition%20Document.pdf)

Note that all links UNDER these pages, if beginning with [www.nws.noaa.gov](http://www.nws.noaa.gov),  
will also change.

A legacy page that displays LAMP station forecast images, located at  
<https://www.nws.noaa.gov/mdl/gfslamp/stnplots.php>, will not be migrated to  
the new web server and is thus being discontinued. Public comments on the  
proposed discontinuation of this page were previously solicited via Public  
Information Statement (PNS) 24-11 at:

[https://www.weather.gov/media/notification/pdf 2023 24/pns24-  
11 lamp glmp v2.6.pdf](https://www.weather.gov/media/notification/pdf%2023%2024/pns24-11_lamp_glmp_v2.6.pdf)

MDL received no comments objecting to the discontinuation of the stnplots.php webpage.

Questions, comments or requests regarding this change should be directed to:
