

Severe Weather And Flooding March 9-13, 2006

Four rounds of severe weather and flooding occurred during the period from March 9-13, 2006.

- From March 9-13, there were **111** large hail, damaging wind, or tornado events in the area served by the Paducah office. Numerous flash flood events occurred. For all of these events, the Paducah office issued over **200** severe weather and flash flood warnings.
- During this period, **four fatalities** occurred. Two tornado fatalities occurred in Perry County, Missouri in a long-track F3 tornado. Two flash flood fatalities occurred when motorists attempted to drive through flooded areas. One fatality was in Webster County, KY and another was near the Carter/Butler County border in southeast Missouri.

March 9-13, 2006 Photo Gallery

- Photo of site of two fatalities in Perry County, MO tornado. This site along U.S. Highway 61 is where a vehicle was thrown into the propane tank, killing the occupants. They had just left their mobile home for safer shelter.

Photo of destroyed brick home near U.S. Highway 61 in Perry County.

The following two photos were taken near U.S. Highway 61.

Photo of large hail with a tornadic supercell that passed through Piedmont in Wayne Co., MO around 2:30 A.M. on March 13. Forwarded by KFVS-12 television. Hail was reported up to 3 inches in diameter in this area.

Photo of destroyed barn in northern Massac County, IL near Boaz, courtesy of Beau Dodson. Damage occurred during early morning hours (about 5:30 A.M.) of March 12.

Photo of flooding in Boonville, IN late on the afternoon of March 12. Photo courtesy of Brady Helms.

Photo of damage to a gas station canopy in Ullin, IL in Pulaski County. Other structures were damaged in Ullin very early on March 12. A pickup truck with a camper trailer was overturned in Pulaski County.

Photo of a damaged house near Olive Branch, IL (in Alexander County) from the March 9 wind event.

Photo of destroyed farm structure in Carlisle County, KY from the March 9 wind event. Numerous roofs and farm buildings were damaged in Carlisle County.

March 9 - Widespread wind damage

- Several rounds of severe thunderstorms occurred Thursday, March 9. Severe thunderstorms began before sunrise and continued through the evening hours. Wind damage was isolated during the morning hours, then became more widespread during the afternoon and evening.
- Flooding problems resulted from the widespread heavy rainfall, especially along and northwest of the Ohio River, where 3 to 6 inches of rain occurred. One fatality was blamed on the flooding southeast of Ellsinore, Missouri, near the Carter/Butler County line. A motorist died while attempting to cross a flooded area.
- Wind damage was most concentrated across western Kentucky, where gusts from 60 to 70 MPH were common. Storm damage surveys indicated isolated gusts to at least 90 MPH in Carlisle County. Gusts at the National Weather Service office in Paducah were measured to 61 MPH, and sustained winds peaked at 48 MPH. The wind damage across western Kentucky was associated with a rapidly moving line of thunderstorms.
- Following are details on three of the most significant wind events surveyed by NWS personnel:

...PRELIMINARY DAMAGE SURVEY RESULTS FOR STODDARD COUNTY MISSOURI...
NOTE: THIS EVENT HAS BEEN RECLASSIFIED AS AN F1 TORNADO

THE FOLLOWING IS A PRELIMINARY DAMAGE ASSESSMENT FOR THE DAMAGE THAT OCCURRED NEAR DEXTER MISSOURI IN STODDARD COUNTY ON MARCH 9 2006.

- * EVENT DATE: THURSDAY MARCH 9TH.
- * EVENT TIME: 553-556 PM CST.
- * EVENT TYPE: F1 TORNADO.
- * EVENT LOCATION: APPROX. 1 TO 1.5 MILES NORTHWEST OF DEXTER MISSOURI
- * PEAK WIND: 75 TO 80 MPH
- * INJURIES: NONE
- * FATALITIES: NONE
- * DISCUSSION/DAMAGE: TWO LOCATIONS OF DAMAGE WERE OBSERVED. THE FIRST AREA NEARLY PARALLELED HIGHWAY 60 BETWEEN ROUTE AD AND COUNTY ROAD 413 (ONE MILE ROAD). AT ONSET...30 CARS WERE DAMAGED AT A CAR DEALERSHIP WITH WINDOWS BROKEN. A MOBILE HOME WAS TURNED ON ITS SIDE AND PUSHED NEXT TO ANOTHER TRAILER IN A MOBILE HOME DEALERSHIP. THE MOBILE HOME WAS NOT SECURED. THE SOUTH END OF A CHURCH HAD 4 TO 6 FEET OF ITS ROOF TORN OFF AND DAMAGE TO THE BRICK FASCIA ON THE SOUTH FACING WALL. ONE UTILITY POLE WAS ALSO SNAPPED OFF.

THE SECOND AREA OF DAMAGE WAS APPROXIMATELY 500 YARDS NORTH OF HIGHWAY 60...JUST WEST OF COUNTY ROAD 413 (ONE MILE ROAD). THERE... ONE HEAVY EQUIPMENT SHED WITH "J" BOLTS WAS BLOWN DOWN. FENCING AND 3 TO 4 TREES WERE BLOWN DOWN AS WELL.

...PRELIMINARY DAMAGE SURVEY RESULTS FOR ALEXANDER COUNTY ILLINOIS...

THE FOLLOWING IS A PRELIMINARY DAMAGE ASSESSMENT FOR THE DAMAGE THAT OCCURRED AT OLIVE BRANCH IN ALEXANDER COUNTY ILLINOIS ON MARCH 9 2006.

- * EVENT DATE: THURSDAY MARCH 9TH
- * EVENT TIME: 1205 PM CST.
- * EVENT TYPE: MICROBURST.
- * EVENT LOCATION: OLIVE BRANCH ILLINOIS.
- * PEAK WIND: 80 TO 85 MPH
- * AVERAGE PATH WIDTH: 750 YARDS.
- * PATH LENGTH: 610 YARDS.
- * INJURIES: NONE
- * FATALITIES: NONE
- * DISCUSSION/DAMAGE: DIVERGENT DAMAGE FROM WEST EAST-SOUTHEAST. ONE GARAGE SLID OFF FOUNDATION. DAMAGE TO A FRONT PORCH. SEVERAL TREES DOWN WITH SOME BROKE OFF 20 FEET ABOVE THE GROUND. ONE TREE FELL

ON MOBILE HOME. HALF ROOF BLOWN OFF METAL BUILDING. ONE SHED BLOWN OFF FOUNDATION. ONE SMALL STORAGE SHED DESTROYED. ONE HOME WITH SCREENS AND WINDOWS TORN AND BROKEN.

...PRELIMINARY DAMAGE SURVEY RESULTS FOR CARLISLE COUNTY KENTUCKY...

THE FOLLOWING IS A PRELIMINARY DAMAGE ASSESSMENT FOR THE DAMAGE THAT OCCURRED OVER MOST OF CARLISLE COUNTY KENTUCKY ON MARCH 9 2006.

- * EVENT DATE: THURSDAY MARCH 9TH
- * EVENT TIME: 645 PM CST
- * EVENT TYPE: MACROBURST WITH FUNNEL CLOUDS.
- * EVENT LOCATION: MOST ALL OF CARLISLE COUNTY HAD DAMAGE.
- * PEAK WIND: 90 TO 100 MPH
- * AVERAGE PATH WIDTH: 6 AND A HALF MILES.
- * PATH LENGTH: 14 AND A HALF MILES
- * INJURIES: NONE
- * FATALITIES: NONE
- * DISCUSSION/DAMAGE: THE MACROBURST DESCENDED 4 MILES NORTHWEST OF BARDWELL...IN THE NORTHWEST PART OF THE COUNTY AND ITS WIDTH EXTENDED SOUTHWARD TO 5 MILES WEST OF ARLINGTON...IN THE SOUTHWEST PART OF THE COUNTY. THE DAMAGING WINDS PROCEEDED ACROSS THE COUNTY WITH A MAINLY EAST-NORTHEASTERLY COMPONENT. THE DAMAGE IN THE NORTHERN PORTIONS OF THE COUNTY WAS ORIENTED IN A NORTHEASTWARD FASHION. IN THE CENTER PORTIONS DAMAGE WAS IN A EAST-NORTHEAST ORIENTATION. IN THE SOUTHERN PORTIONS OF THE COUNTY THE DAMAGE WAS ORIENTED TO THE SOUTHEAST. ALL OF THE AFOREMENTIONED ORIENTATION IS INDICATIVE OF A CLASSIC DIVERGENT MACROBURST DAMAGE PATTERN.

THERE WERE ALSO TWO FUNNELS SITED BY ADVANCED TRAINED SPOTTERS BUT NEVER TOUCHED DOWN. THERE WERE UNCONFIRMED PUBLIC REPORTS OF A TOUCHDOWN. OVER A HUNDRED TREES WERE DOWN ON MAJOR ROADS. EVERYTHING FROM BULLDOZERS TO CHAINSAWS WERE USED TO CLEAR AREA ROADWAYS. TREES FELL ON A CAR TRAPPING PEOPLE INSIDE. A BARN ALSO FELL ONTO A CAR BUT THE PEOPLE WERE ABLE TO ESCAPE. A GRAIN BIN WAS BLOWN OVER AND BLOCKING HIGHWAY 849 IN THE NORTHEAST PART OF THE COUNTY. MAJOR STRUCTURAL DAMAGE TO WELL CONSTRUCTED BUILDINGS NEAR BARDWELL...WITH WIDESPREAD MINOR STRUCTURAL DAMAGE AND SHINGLES BLOWN OFF COUNTY WIDE. NUMEROUS OLDER BARNS COMPLETELY FLATTENED OR DESTROYED.

A preliminary listing of all reported events follows....

8 TO 10 TREES DOWN WITH ONE BARN BLOWN ACROSS ROAD ON
EDGE OF TOWN.

March 11 (Early morning) - Hail in southern IL and southwest IN

- During the late night/early morning hours, numerous thunderstorms produced hail across southwest Indiana and southern Illinois. Several reports of nickel to half-dollar size hail were received. Marion, Illinois and Evansville, IN were among those places reporting large hail.

March 11-12 (Night/Early morning) - Long-track F3 tornado, wind damage, major flash flooding

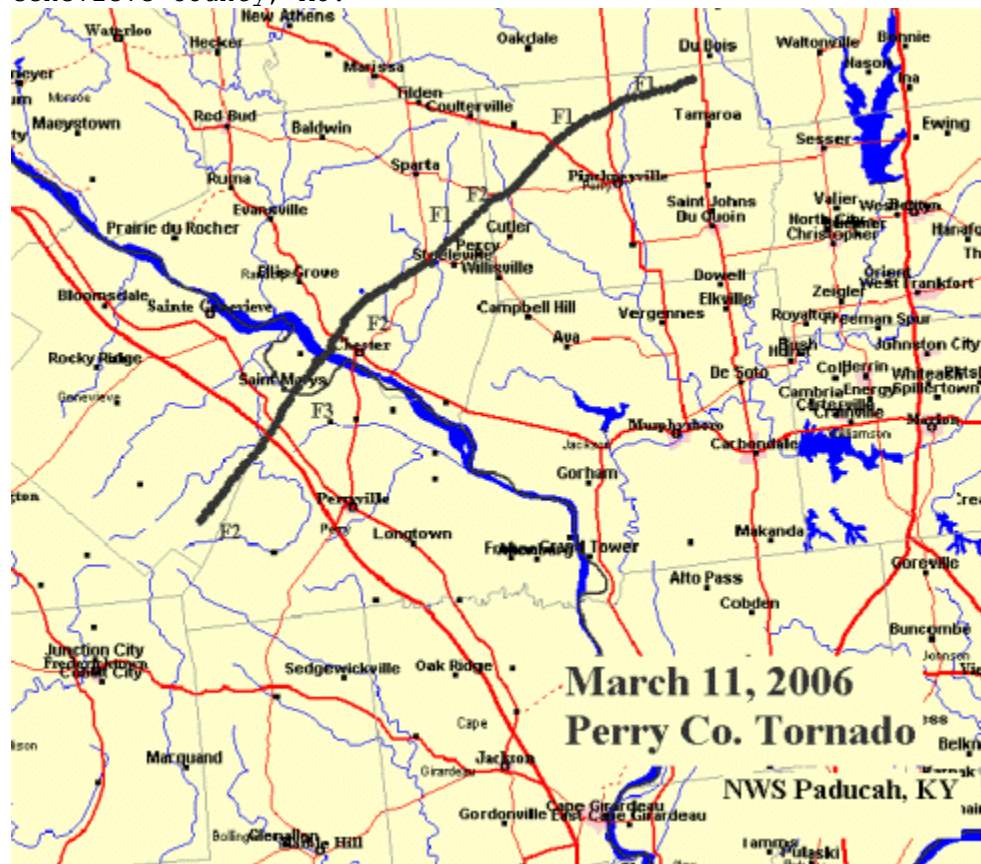

- An outbreak of severe thunderstorms occurred over much of our region the night of Saturday, March 11 into the early morning of March 12.
- A long-track tornado crossed Perry County, Missouri, causing two fatalities as it peaked at F3 intensity.
- The same tornado crossed into Perry County, IL within two hours, injuring two people and severely damaging dozens of homes.
- A high-end F1 tornado occurred in Wayne County, IL.
- A 14-mile long swath of wind damage occurred in the counties of Pulaski and Massac in the southern tip of Illinois.
- Additionally, significant flooding occurred over parts of southern Illinois and southwest Indiana as a result of widespread persistent thunderstorms. Numerous road closures and some water rescues were conducted across southwest Indiana, including Evansville. Water rescues were also conducted near Mount Vernon, Illinois.

March 11-12 Perry County F3 Tornado, Major Flooding, Wind Damage

- An outbreak of severe thunderstorms occurred over much of our region the night of Saturday, March 11 into the early morning of March 12. A long-track tornado crossed Perry County, MO and Perry County, IL during the late evening.
- The same supercell that spawned the Perry County tornado produced another weaker tornado in Wayne County, IL.
- A 14-mile long swath of wind damage occurred in the counties of Pulaski and Massac in the southern tip of Illinois.
- Additionally, significant flooding occurred over parts of southern Illinois and southwest Indiana as a result of widespread persistent thunderstorms. Numerous road closures and some water rescues were conducted across southwest Indiana, including Evansville. Water rescues were also conducted near Mount Vernon, Illinois.
- Rainfall for the period from 7 A.M. March 8 to 7 A.M. March 12 was **8.98 inches at Grayville, IL** in Edwards County. Although this was the highest report, there were several reports of 7 to 8 inches during the same time period, including **8.11 inches at Jackson, MO** in Cape Girardeau County and **7.93 inches at Mount Vernon, IL**.

PERRY COUNTY F3 TORNADO

Indications are that the F3 tornado damage in Perry County, MO and the F2 damage in Perry Co. IL was part of a 54-mile long path that began in Ste. Genevieve County, MO.

Below is the preliminary damage assessment for the segment of tornado in Perry County, Missouri:

- * EVENT DATE: SATURDAY NIGHT MARCH 11TH.
- * EVENT TIME: 944 PM CST WAS 1ST REPORT OF 1ST TOUCHDOWN.
- * EVENT TYPE: F3 TORNADO (MAX) ON THIS SEGMENT.
- * EVENT LOCATION: DAMAGE TRACK ON THIS SEGMENT IS FROM APPROXIMATELY 6 MILES SOUTH-SOUTHWEST OF SAINT MARYS...NEAR HIGHWAY NN AND JUST WEST OF THE TOWN OF GIBONEY...TO APPROXIMATELY 1 MILE SOUTH-SOUTHEAST OF SAINT MARYS...ENDING CLOSE TO RAILWAY TRACKS JUST NORTH OF COUNTY ROAD 950 BY OLD RIVER.
- * PEAK WIND SPEED ON THIS SHORT SEGMENT: 170 MPH
- * DAMAGE WIDTH: 350 TO 400 YARDS AVERAGE WIDTH.
- * PATH LENGTH: 7.25 MILES.
- * INJURIES: AT LEAST 4 PEOPLE ON THIS SHORT SEGMENT WERE KNOWN TO BE SIGNIFICANTLY INJURED AS THEY WERE PICKED UP BY TORNADIC WINDS AND THROWN 100 YARDS. IN ADDITION THEY WERE ALSO HIT HARD BY OTHER THROWN DEBRIS...CUMULATIVELY RESULTING IN SIGNIFICANT INJURY TO THEIR PERSONS.
- * FATALITIES: 2 KNOWN ON THIS SEGMENT OF THE STORM. 2 FATALITIES WERE RESIDENTS OF A MOBILE HOME WHO TRIED TO FLEE SAID RESIDENCE...BUT UPON DOING SO GOT IN THEIR CAR. THE TORNADO PICKED UP THE CAR AND THREW IT INTO A PROPANE TANK...AND BOTH PASSENGERS DIED AS A RESULT.
- * DISCUSSION/DAMAGE: IT MUST BE STRESSED THAT THIS IS ONLY A PRELIMINARY ASSESSMENT FOR THE SHORT SEGMENT OF THIS TORNADO IN NORTHERN PERRY COUNTY MISSOURI ONLY. MORE EXTENSIVE ADDITIONAL ASSESSMENTS FOR THE OVERALL TRACK OF THIS TORNADO WILL BE FORTHCOMING. IN ADDITION TO THE AFOREMENTIONED REPORT...THREE MOBILE HOMES WERE ALSO FLATTENED...ONE BRICK HOUSE HAD ITS ROOF AND SEVERAL WALLS BLOWN OFF...AND NUMEROUS VEHICLES WERE REPORTED TO BE TOSSED AROUND THE ROAD.

Wayne County, IL F1 tornado

The following is the preliminary damage assessment for a tornado in southwest Wayne County Illinois.

- * Event Date: Saturday March 11, 2006
 - * Event Time: Approximately 1155 PM CST.
 - * Event Type: F1 Tornado.
 - * Event Location: 5 miles southwest of Wayne City to 4 miles southwest of Wayne City.
 - * Peak Wind: 110 MPH.
 - * Average Path Width: 300 yards. Maximum width approximately 600 yards.
 - * Path Length: 1 mile.
 - * Injuries: None.
 - * Fatalities: None.
 - * Discussion/Damage: There were several eyewitness accounts of the tornado that touched down just before midnight just to the east of Middleton in southwest Wayne County Illinois. The damage survey revealed that numerous large trees were uprooted or snapped off. One house and one well-built school building sustained structural damage when trees fell onto them. A few mobile homes were overturned and several barns were destroyed. The tornado produced swirl marks in a field that were still visible 4 days after the tornado.
-

March 12-13 (Late night/early morning) - **Isolated large hail, wind in southeast Missouri**

- The fourth and final round of severe weather occurred before dawn on March 13. A supercell thunderstorm crossed parts of Carter, Wayne, and Bollinger Counties in southeast Missouri. Hail up to 3 inches in diameter fell in Piedmont, MO between 2 and 3 A.M. Numerous trees were uprooted and thrown into a creek in a remote area of Bollinger County.
- Although relatively little severe weather was reported in our area during this episode, areas from central Illinois west across Missouri experienced considerably more widespread and destructive storms.
