## Greenhouse Gas (GHG) Management

Successfully measure and benchmark your company's GHG emissions.

Is your organization positioned to respond to new, increased or ongoing reporting of GHG emissions?

- Has your company been able to create and verify your baseline emissions data?
- Are you able to demonstrate continual improvement on reducing emissions?
- Are you engaged in international, national, sector, regional and/or local GHG reduction initiatives?

We can assist you:

- Develop the skillset to present credible, defensible greenhouse gas data
- Measure and manage ongoing GHG data
- Inventory your GHG contributors
- Assess the scopes most material to your company
- Select and apply a calculation methodology
- Validate and present the finding to organizational leadership

Why WSBC/WMEP?

- Together WSBC and WMEP have helped 100s of companies learn, apply, and be recognized for their organization's sustainability actions through their highly successful Green Masters Program.
- WMEP has helped 100s of companies markedly improve their resource utilization and waste reduction through its Award-Winning Profitable Sustainability program.
- Together we bring an unparalleled amount of talent, expertise, and practical experience in the field of sustainability to guide your organization's sustainability strategy and GHG reporting.

Getting started is easy:
